Relevance

Due to population aging, the number of older migrants living in European countries is rapidly rising. Accordingly, the morbidity patterns and health needs of migrants are gradually changing. For instance, more than 1 million cases of dementia and milder cognitive disorders can be estimated in the migrant population living in Europe. Developing diversity-sensitive policies and practices is therefore imperative for our healthcare systems to foster the inclusion of migrants (as other vulnerable groups) in the public health response to dementia. The *ImmiDem* project was designed to collect “real world” information on the dimensions of this emerging problem in Italy and the preparedness of national dementia services.

Objectives

The present virtual meeting will address the need of developing a diversity-sensitive approach to dementia, focusing on cross-cultural neuropsychology, on the preparedness of services, on situated prevention. These aspects will also be framed within the wider policies on aging and migration in place in Europe. The meeting will be an opportunity to discuss the results of the *ImmiDem* study and to present other ongoing initiatives on the subject at the European level.

Structure

The meeting is structured in seven presentations by researchers, delegates from public health agencies and patient associations. A short question and answer session will follow each presentation.

GENERAL INFORMATION

Venue

The Seminar will take place on Starleaf online platform. Link to the streaming will be provided afterwards.

Target audience

The event is intended for researchers, students, and healthcare professionals.

Registration

Participation is free of charge. Registration is not required. A maximum of 1000 participants will be admitted.

CME credits

Not provided.

Certificate of participation

Not provided.

For any further information, please contact the Scientific Secretariat.

Towards a diversity-sensitive prevention, diagnosis, and management of cognitive disorders: sharing the findings of the *ImmiDem* project

24 February 2022

Virtual Meeting

organized by

ISTITUTO SUPERIORE DI SANITÀ
National Centre for Disease Prevention and Health Promotion

PROGRAMME

Chairpersons: **Clara Calia, Simone Pomati**

- 10.00 Opening and Welcome
Marco Canevelli
- 10.10 *Refugee and migrant health: why a priority for public health?*
Santino Severoni
- 10.30 *Intercultural care and support for people with dementia from minority ethnic groups*
Dianne Gove
- 10.50 *Dementia in migrants living in Italy. the findings of the ImmiDem project*
Marco Canevelli
- 11.20 Coffee break
- 11.40 *The EU-Atlas: Dementia & Migration*
Jessica Monsees
- 12.00 *Cognitive assessment in diverse populations*
Thomas Rune Nielsen
- 12.20 *The European Consortium on Cross-Cultural Neuropsychology (ECCroN)*
Sanne Franzen
- 12.40 *Dementia prevention in diverse populations*
Naaheed Mukadam
- 13.00 Closing remarks

Throughout the event you will be able to ask questions directly to the panellists by sending them at:
qa.webinar@iss.it

SPEAKERS and CHAIRPERSONS

- Marco Canevelli** - Italian National Institute of Health, Rome, Italy; Sapienza University of Rome, Italy
- Clara Calia** - University of Edinburgh, Edinburgh, Scotland, UK
- Sanne Franzen** - Erasmus MC University Medical Center, Rotterdam, the Netherlands
- Dianne Gove** - Alzheimer Europe, Luxembourg, Luxembourg
- Jessica Monsees** - Deutsches Zentrum für Neurodegenerative Erkrankungen (DZNE), Greifswald, Germany
- Naaheed Mukadam** - University College London, London, UK
- Thomas Rune Nielsen** - Danish Dementia Research Centre, Copenhagen University Hospital, Copenhagen, Denmark
- Simone Pomati** - Luigi Sacco Hospital, University of Milan, Milan, Italy
- Santino Severoni** - Health and Migration Programme WHO, Geneva, Switzerland

Scientific Coordinators

- MARCO CANEVELLI (marco.canevelli@iss.it)
- NICOLA VANACORE (+39 06 49904243 - nicola.vanacore@iss.it)
