This PDF file includes:

Table S1. Socio-demographic characteristics of the sample.

Table S2. Distribution of participants according to the Local Health Unit and response rate for each Local Health Unit adjusted for the total number of employees.

Table S1
Socio-demographic characteristics of the sample

n=1,796	n	%
Sex		
Female	1,418	79
Male	378	21
Marital status		
Married	1,086	60.5
Single	514	28.6
Separated, divorced	196	10.9
Profession		
Nurse or health professional	950	52.9
Health care assistant	275	15.3
Medical doctor	183	10.2
Administrative/ technical staff	122	6.8
Educator/ professional educator	108	6
Psychologist	84	4.7
Social worker	74	4.1
Department		
Emergency	233	13
Addiction	200	11.1
Mental health	172	9.6
Other	1,191	66.3
Setting		
Hospital	1,082	60.2
Territorial/ ambulatory	694	38.6
Nursing home	6	0.3
Missing	14	0.8

n: number.

Table S2
Distribution of participants according to the Local Health Unit and response rate for each Local Health Unit adjusted for the total number of employees

Local Health Unit (ULSS) (n=1,796)	n	%	Number of employees	Response rate (%)
"Azienda Zero"	1	0.1	-	-
1	38	2.1	3,821	0.99
2	736	41	9,507	7.74
3	455	25.3	7,734	5.88
4	116	6.5	2,525	4.59
5	167	9.3	3,289	5.08
6	228	12.7	7,170	3.18
7	38	2.1	4,146	0.92
8	1	0.1	-	-
9	2	0.	-	-
missing	14	0.8%	-	-
