

# The transition towards a safe and sustainable food system in a changing world: a One Health challenge

**Rome, ISS, October 6**

**Aula Pocchiari**

An international workshop organized by the Istituto Superiore di Sanità and the Istituto Zooprofilattico Sperimentale delle Venezie

Register [here](#)

## Monday 06 October

**09:30** Welcome

**Prof. Rocco Bellantone** (*President of the Istituto Superiore di Sanità*), **Dr. Andrea Piccioli** (General Director ISS), **Dr. Giovanni Leonardi** (*Director One Health Department, Ministry of Health*), **Dr. Antonia Ricci** (*General Director, IZS-Ve*); **Dr. Umberto Agrimi** (*Director, Food Safety Department, ISS*)

**10:30 Introductory speech:** The transition to safe and sustainable food production systems: a forward-looking view

**Stefano Morabito**  
*Istituto Superiore di Sanità*

**10:50 Keynote talk:** Food Safety Foresight: a global perspective on emerging issues

**Vittorio Fattori**  
*Food and Agriculture Organization of the United Nations*

**11:20 Keynote talk:** The One Health approach supports Europe's commitment towards sustainable food systems

**Stephan Bronzwaer**  
*European Food Safety Authority*

**11:50 Coffee Break**

**12:30 Invited Talk:** Securing food safety in changing food systems

**Milou van de Schans**  
*Wageningen Food Safety Research, The Netherlands*

**12:55 Invited Talk:** Boosting water resilience through reuse and non-conventional sources in agrifood systems: hands-on experience from a water-scarce context

**Lucia Gusmaroli**  
*Catalan Water Partnership, Spain*

**13:15 Invited Talk:** Case study from Italy

**Carmen Losasso**  
*Istituto Zooprofilattico Sperimentale delle Venezie, Italy*

**13:30 Lunch Break**

### Round Table (14:30-16:30)

**Moderator:** *Rose O'Donovan; AgRA FACTS, Brussels.*

*A discussion panel, composed by the speakers and delegates from EFSA (Dr. Stephan Bronzwaer), FAO (Dr. Vittorio Fattori), WHO (Dr. Simona Seravesi), WOA (TBC), UNEP (Dr. Pablo Sagredo Martin) will be prompted to elaborate on the following themes, with the engagement of the plenum*

How to intercept and evaluate food microbiological safety under sustainability drivers

What is requested to the laboratories and legislators

Bottom-up construction: societal challenges and the accountability of institutions

The pro-active role of the citizen and the sustainability labels of food processes

**16:30 Closure**
