DIRETTIVA 98/98/CE DELLA COMMISSIONE

del 15 dicembre 1998

recante venticinquesimo adeguamento al progresso tecnico della direttiva 67/548/CEE del Consiglio concernente il ravvicinamento delle disposizioni legislative, regolamentari ed amministrative relative alla classificazione, all'imballaggio e all'etichettatura delle sostanze pericolose

(Testo rilevante ai fini del SEE)

LA COMMISSIONE DELLE COMUNITÀ EUROPEE,

visto il trattato che istituisce la Comunità europea,

vista la direttiva 67/548/CEE del Consiglio, del 27 giugno 1967, concernente il ravvicinamento delle disposizioni legislative, regolamentari ed amministrative relative alla classificazione, all'imballaggio e all'etichettatura delle sostanze pericolose ⁽¹⁾, modificata da ultimo dalla direttiva 98/73/CE della Commissione ⁽²⁾, in particolare l'articolo 28,

considerando che l'allegato I della direttiva 67/548/CEE contiene un elenco di sostanze pericolose e specifica inoltre le procedure di classificazione ed etichettatura per ogni sostanza; che l'elenco delle sostanze pericolose figurante in detto allegato deve essere adeguato alla luce delle attuali conoscenze scientifiche e tecniche; che di conseguenza è necessario modificare la prefazione all'allegato I per inserirvi le modifiche apportate alla nomenclatura, alla presentazione delle sostanze, alle note relative all'identificazione, classificazione ed etichettatura delle sostanze e alle note concernenti l'etichettatura dei preparati; che nell'elenco delle sostanze pericolose di cui all'allegato I figurano sostanze per le quali, in forza dell'atto di adesione dell'Austria, della Finlandia e della Svezia, sono state consentite in Austria e in Svezia una classificazione specifica provvisoria e deroghe concernenti l'etichettatura; che l'atto di adesione prevede una revisione dei requisiti di classificazione e di etichettatura di tali sostanze; che tale revisione rende necessario un adeguamento della classificazione di alcune di queste sostanze;

considerando che l'allegato III della direttiva 67/548/CEE contiene un elenco di frasi relative alla natura dei rischi specifici attribuiti alle sostanze e ai preparati pericolosi; che è necessario introdurre nuove frasi

relative ai pericoli per la salute connessi con talune sostanze e preparati pericolosi;

considerando che l'allegato IV della direttiva 67/548/CEE contiene un elenco delle frasi relative ai consigli di prudenza riguardanti le sostanze e i preparati pericolosi; che è necessario rivedere talune frasi relative ai consigli di prudenza riguardanti i pericoli per la salute e per l'ambiente; che è necessario introdurre alcune frasi relative ai consigli di prudenza riguardanti i pericoli per la salute; che è altresì necessario introdurre alcune frasi combinate relative all'uso delle sostanze e dei preparati pericolosi;

considerando che l'allegato VI della direttiva 67/548/CEE contiene i criteri generali di classificazione e di etichettatura delle sostanze e dei preparati pericolosi; che è necessario modificare tali criteri;

considerando che le misure previste dalla presente direttiva sono conformi al parere del comitato per l'adeguamento al progresso tecnico delle direttive miranti all'eliminazione degli ostacoli tecnici agli scambi nel settore delle sostanze e dei preparati pericolosi,

HA ADOTTATO LA PRESENTE DIRETTIVA:

Articolo 1

La direttiva 67/548/CEE è modificata come segue:

1) L'allegato I è così modificato:

- a) Il testo dell'allegato 1A della presente direttiva sostituisce il corrispondente testo della prefazione.
- b) Le voci elencate nell'allegato 1B della presente direttiva sostituiscono le corrispondenti voci.
- c) Sono inserite le voci elencate nell'allegato 1C della presente direttiva.
- d) Sono soppresse le voci elencate nell'allegato 1D della presente direttiva.

⁽¹⁾ GU L 196 del 16.8.1967, pag. 1.

⁽²⁾ GU L 305 del 16.11.1998, pag. 1.

- 2) L'allegato 2 della presente direttiva è inserito nell'allegato III.
- 3) L'allegato IV è così modificato:
- a) Le frasi elencate nell'allegato 3A della presente direttiva sostituiscono le corrispondenti frasi.
- b) Sono inserite le frasi elencate nell'allegato 3B della presente direttiva.
- c) Sono inserite le frasi combinate elencate nell'allegato 3C della presente direttiva.
- 4) L'allegato VI è modificato come indicato nell'allegato 4 della presente direttiva.

Articolo 2

1. Gli Stati membri attuano le disposizioni legislative, regolamentari e amministrative necessarie per conformarsi alla presente direttiva entro il 1° luglio 2000. Essi ne informano immediatamente la Commissione.

Quando gli Stati membri adottano tali disposizioni, queste contengono un riferimento alla presente direttiva o sono corredate di un siffatto riferimento all'atto della

pubblicazione ufficiale. Le modalità del riferimento sono decise dagli Stati membri.

2. Gli Stati membri informano la Commissione delle principali disposizioni nazionali che essi adottano nel settore disciplinato dalla presente direttiva e trasmettono una tabella che indichi le correlazioni tra la presente direttiva e tali disposizioni.

Articolo 3

La presente direttiva entra in vigore il terzo giorno successivo alla pubblicazione nella *Gazzetta ufficiale delle Comunità europee*.

Articolo 4

Gli Stati membri sono destinatari della presente direttiva.

Fatto a Bruxelles, il 15 dicembre 1998.

Per la Commissione

Ritt BJERREGAARD

Membro della Commissione

ALLEGATO 1A

«PREFAZIONE ALL'ALLEGATO I

Introduzione

L'allegato I è un elenco di sostanze pericolose per le quali, a livello comunitario, sono state concordate una classificazione e un'etichettatura armonizzate conformemente alla procedura di cui all'articolo 4, paragrafo 3, della presente direttiva.

Elenco delle sostanze

Nell'allegato I le sostanze sono elencate in funzione del numero atomico dell'elemento più caratteristico delle loro proprietà. La tabella A contiene un elenco degli elementi chimici disposti secondo il loro numero atomico. Data la loro varietà, le sostanze organiche sono state inserite nelle categorie convenzionali indicate nella tabella B.

Il numero di ogni sostanza è rappresentato da una sequenza numerica del tipo ABC-RST-VW-Y, dove:

- ABC rappresenta il numero atomico dell'elemento chimico più caratteristico (preceduto da uno o due zeri per completare la sequenza), o il numero della categoria convenzionale relativa alle sostanze organiche;
- RST rappresenta il numero progressivo delle sostanze considerate nella sequenza ABC;
- VW indica la forma di cui la sostanza viene prodotta o immessa in commercio;
- Y rappresenta la cifra di controllo (check-digit) calcolata secondo il metodo ISBN (International Standard Book Number).

Ad esempio, il numero del clorato di sodio è: 017-005-00-9.

Per le sostanze pericolose incluse nell'inventario europeo delle sostanze chimiche esistenti a carattere commerciale (Einecs, GU C 146 A del 15.6.1990) viene indicato anche il numero Einecs, rappresentato da una sequenza di sette cifre del tipo XXX-XXX-X che inizia da 200-001-8.

Per le sostanze pericolose notificate ai sensi della presente direttiva viene indicato il numero della sostanza dell'elenco europeo delle sostanze chimiche notificate (Elincs). Detto numero è rappresentato da una sequenza di sette cifre del tipo XXX-XXX-X che inizia da 400-010-9.

Per le sostanze pericolose incluse nell'elenco degli "ex-polimeri" (Documento, Ufficio delle pubblicazioni ufficiali delle Comunità europee, 1997. ISBN 92-827-8995-0) viene indicato il numero dell'ex-polimero, rappresentato da una sequenza di sette cifre del tipo XXX-XXX-X che inizia da 500-001-9.

Viene anche indicato il numero Cas (Chemical Abstracts Service) per facilitare l'identificazione della sostanza. Va sottolineato che il numero Einecs comprende sia le forme anidre che idrate di una sostanza, mentre spesso vi sono numerazioni Cas diverse per le due forme. In ogni caso il numero Cas indicato si riferisce soltanto alla forma anidra e pertanto non descrive sempre le sostanze in modo altrettanto preciso rispetto al numero Einecs.

In genere non sono indicati i numeri Einecs, Elincs, "ex-polimeri" o Cas per i preparati composti da oltre quattro sostanze diverse.

Nomenclatura

Le sostanze pericolose sono contrassegnate ovunque possibile dalle denominazioni Einecs, Elincs o ex-polimeri. Le altre sostanze non incluse negli elenchi Einecs, Elincs o degli ex-polimeri sono designate con una

denominazione chimica riconosciuta a livello internazionale (ad esempio ISO, IUPAC); in alcuni casi viene specificato anche il nome comune.

Le impurità, gli additivi e altri componenti minori non vengono solitamente indicati, sempreché non contribuiscano in modo rilevante alla classificazione della sostanza.

Alcune sostanze sono descritte come "miscela di A e B" e si riferiscono ad una miscela specifica. In alcuni casi, quando risulta necessario definire la sostanza immessa in commercio, sono indicate le proporzioni delle sostanze principali presenti nella miscela.

La denominazione di alcune sostanze comprende l'indicazione della purezza espressa in percentuale. Le sostanze che presentano un tenore più elevato di sostanza attiva (ad esempio un perossido organico) non figurano nell'allegato I e possono presentare altre proprietà pericolose (ad esempio esplosive). Quando vengono indicati i limiti di concentrazione specifici, essi si riferiscono alla sostanza o alle sostanze figuranti nell'elenco. In particolare, nel caso di miscele o di sostanze descritte con l'indicazione della purezza specifica in percentuale, i limiti si applicano alla sostanza nella forma in cui questa viene descritta nell'allegato I, e non alla sostanza pura.

L'articolo 23, paragrafo 2, lettera a), prevede che, per le sostanze elencate nell'allegato I, il nome della sostanza che deve figurare sull'etichetta corrisponda ad uno di quelli indicati nell'allegato. Per facilitare l'identificazione di alcune sostanze sono state aggiunte in parentesi quadra informazioni supplementari che comunque non devono necessariamente figurare sull'etichetta.

Alcune voci contengono indicazioni circa le impurità; per esempio il n. 607-190-00-X: acrilammidometossiacetato di metile (contenente $\geq 0,1\%$ di acrilammide). In questi casi il riferimento tra parentesi fa parte del nome e deve figurare sull'etichetta.

Alcune voci si riferiscono a gruppi di sostanze; per esempio il n. 006-007-00-5: "acido cianidrico (sali di ...) ad eccezione dei cianuri complessi, come ferrocianuri, ferricianuri e ossicianuro di mercurio". Per le singole sostanze incluse in queste voci deve essere indicata la designazione Eines o un'altra designazione riconosciuta a livello internazionale.

Presentazione

Per ogni sostanza figurante nell'allegato I vengono fornite le seguenti informazioni:

a) *Classificazione*

- i) Il processo di classificazione consiste nell'inserire una sostanza in una o più categorie di pericolo di cui all'articolo 2, paragrafo 2, della direttiva 93/32/CEE, attribuendole la o le corrispondenti frasi di rischio. La classificazione ha implicazioni dirette non solo per l'etichettatura, ma anche per altre disposizioni legislative e regolamentari relative alle sostanze pericolose.
- ii) La classificazione per singola categoria di pericolo viene indicata in riquadri separati, generalmente utilizzando un'abbreviazione che rimanda alla categoria di pericolo e alla o alle corrispondenti frasi di rischio. Tuttavia, in alcuni casi (ad esempio per le sostanze classificate come infiammabili o sensibilizzanti e per alcune sostanze classificate come pericolose per l'ambiente) compaiono solo le frasi di rischio.

iii) In appresso figurano le abbreviazioni di ciascuna categoria di pericolo:

- Esplosivo: E
- Comburente: O
- Estremamente infiammabile: F+
- Facilmente infiammabile: F
- Infiammabile: R 10
- Altamente tossico: T+

- Tossico: T
- Nocivo: Xn
- Corrosivo: C
- Irritante: Xi
- Sensibilizzante: R 42 e/o R 43
- Cancerogeno: Carc. Cat. ⁽¹⁾
- Mutageno: Muta. Cat. ⁽¹⁾
- Tossico per il ciclo riproduttivo: Repr. Cat. ⁽¹⁾
- Pericoloso per l'ambiente: N e/o R 52, R 53, R 59.

iv) Sulla stessa riga sono indicate in riquadri separati frasi di rischio supplementari che descrivono altre proprietà (cfr. punti 2.2.6 e 3.2.8 della guida all'etichettatura), sebbene non facciano formalmente parte della classificazione.

b) *Etichetta*, sulla quale figurano:

- i) la lettera attribuita alla sostanza conformemente all'allegato II [cfr. articolo 23, paragrafo 2, lettera c)], utilizzata come abbreviazione per l'eventuale simbolo e l'indicazione di pericolo;
- ii) le frasi di rischio, rappresentate da una serie di cifre precedute dalla lettera R che indica la natura dei rischi particolari di cui all'allegato III [cfr. articolo 23, paragrafo 2, lettera d)]. Le cifre sono separate da:
 - un trattino orizzontale (-) per indicare enunciazioni separate dei rischi particolari (R), o
 - una barra inclinata (/) per indicare l'enunciazione combinata, in una sola frase, dei rischi particolari di cui all'allegato III;
- iii) i consigli di prudenza, rappresentati da una serie di cifre precedute dalla lettera S che indica le precauzioni di sicurezza raccomandate ai sensi dell'allegato IV [cfr. articolo 23, paragrafo 2, lettera e)]. Anche in questo caso le cifre sono separate da un trattino orizzontale o da una barra inclinata e il significato delle precauzioni di sicurezza raccomandate è spiegato nell'allegato IV. I consigli di prudenza si riferiscono solo alle sostanze; per i preparati i consigli sono scelti in base alle regole abituali.

Si osserva che per talune sostanze e preparati pericolosi venduti al pubblico alcune frasi S sono obbligatorie.

Le frasi S 1, S 2 ed S 45 sono obbligatorie per tutte le sostanze e i preparati altamente tossici, tossici e corrosivi venduti al pubblico.

Le frasi S 2 e S 46 sono obbligatorie per tutte le altre sostanze e preparati pericolosi venduti al pubblico ad eccezione di quelli classificati soltanto come pericolosi per l'ambiente.

Le frasi S 1 e S 2, indicate tra parentesi nell'allegato I, possono anche non comparire sull'etichetta qualora la sostanza o il preparato siano venduti per usi esclusivamente industriali.

c) *Limiti di concentrazione* e relative classificazioni necessari per classificare i preparati pericolosi contenenti la sostanza in conformità della direttiva 88/379/CEE.

Salvo diversamente specificato, i limiti di concentrazione sono espressi in percentuale del peso della sostanza calcolato sulla base del peso totale del preparato.

Quando non vengono espressamente indicati i limiti di concentrazione, nell'applicare il metodo convenzionale di valutazione dei rischi per la salute si utilizzano i limiti di cui all'allegato I della direttiva 88/379/CEE.

⁽¹⁾ Se del caso viene indicata la categoria della sostanza cancerogena, mutagena o tossica per il ciclo riproduttivo ad esempio 1, 2 o 3.

Note esplicative generali

Gruppi di sostanze

Nell'allegato I figurano anche alcuni gruppi di sostanze: in questi casi i requisiti di classificazione e di etichettatura si applicano a tutte le sostanze del gruppo se queste sono immesse in commercio e figurano nell'Einecs o nell'Elincs. Qualora una sostanza inclusa in un gruppo si trovi in un'altra sostanza sotto forma di impurità, ai fini della sua etichettatura vengono presi in considerazione i requisiti di classificazione e di etichettatura relativi al gruppo di sostanze.

In alcuni casi esistono requisiti di classificazione e di etichettatura per sostanze particolari incluse nei gruppi di sostanze. In detti casi, per la sostanza vi sarà una voce specifica nell'allegato I e il gruppo di sostanze recherà l'indicazione "Ad eccezione delle sostanze specificate nel presente allegato".

In alcuni casi determinate sostanze possono essere incluse in più gruppi di sostanze. Per esempio l'ossalato di piombo (Einecs n. 212-413-5) compare sia nella voce dei composti del piombo (082-001-00-6), sia in quella dei sali di acido ossalico (607-007-00-3). In questi casi l'etichettatura della sostanza ricalca quella di ciascuno dei due gruppi di sostanze. Qualora siano indicate classificazioni differenti per lo stesso rischio, l'etichetta della sostanza in questione dovrà recare la frase di rischio corrispondente alla classificazione più restrittiva (cfr. la nota A in appresso).

Salvo indicazione contraria, le voci riguardanti i sali (a prescindere dalla loro denominazione) riportate nell'allegato I si riferiscono sia alla forma anidra sia a quella idrata.

Sostanze con il numero Elincs

Le sostanze dell'allegato I che presentano un numero Elincs sono state notificate ai sensi della presente direttiva. Il produttore o l'importatore che non abbia in precedenza notificato dette sostanze e che intenda immetterle in commercio deve attenersi alle disposizioni della presente direttiva.

Spiegazione delle note relative all'identificazione, classificazione ed etichettatura delle sostanze

Nota A:

Il nome della sostanza deve figurare sull'etichetta sotto una delle denominazioni di cui all'allegato I [cfr. articolo 23, paragrafo 2, lettera a)].

Nell'allegato I è talvolta utilizzata la denominazione generale del tipo: "composti di ..." o "sali di ...". In tal caso, il fabbricante o qualsiasi persona che immette tale sostanza sul mercato è tenuto a precisare sull'etichetta il nome esatto, tenendo conto del capitolo "Nomenclatura" della prefazione.

Esempio: per BeCl_2 (Einecs n. 232-116-4): cloruro di berillio.

La direttiva stabilisce inoltre che i simboli, le indicazioni di pericolo e le frasi R e S da utilizzare per ciascuna sostanza siano tratte dall'allegato I [cfr. articolo 23, paragrafo 2, lettere c), d) e e)].

Per le sostanze che rientrano in un determinato gruppo di sostanze incluse nell'allegato I, i simboli, le indicazioni di pericolo e le frasi R e S da utilizzare devono essere tratti dalla rispettiva voce dell'allegato I.

Per le sostanze che rientrano in più gruppi di sostanze incluse nell'allegato I, i simboli, le indicazioni di pericolo e le frasi R e S da utilizzare per ciascuna sostanza devono essere tratti dalle rispettive voci dell'allegato I. Qualora due voci indichino due classificazioni differenti per lo stesso rischio, si utilizza la classificazione più restrittiva.

Esempio:

Classificazione gruppo 1:	Repr. Cat. 1; R 61 R 33	Repr. Cat. 3; R 62 N; R 50-53	Xn; R 20/22
Classificazione gruppo 2:	Carc. Cat. 1; R 45	T; R 23/25	N; R 51-53
Classificazione sostanza:	Carc. Cat. 1; R 45 T; R 23/25	Repr. Cat. 1; R 61 R 33	Repr. Cat. 3; R 62 N; R 50-53

Nota B:

Talune sostanze (acidi, basi, ecc.) vengono immesse in commercio in soluzione acquosa a diverse concentrazioni e richiedono pertanto un'etichettatura diversa poiché i rischi variano in funzione della concentrazione.

Per le sostanze dell'allegato I accompagnate dalla nota B viene utilizzata una denominazione generale del tipo: "acido nitrico ... %".

In questo caso, il fabbricante o qualsiasi altra persona che commercializza tale sostanza deve indicare sull'etichetta la concentrazione della soluzione in percentuale.

Esempio: acido nitrico 45 %.

La concentrazione espressa in percentuale viene sempre intesa peso/peso, salvo altra indicazione.

È ammesso l'uso di dati supplementari (ad esempio peso specifico, gradi Baumé) o di frasi descrittive (ad esempio fumante o glaciale).

Nota C:

Alcune sostanze organiche possono essere commercializzate sia in forma isomerica specifica, sia come miscela di più isomeri.

Pertanto nell'allegato I viene talvolta utilizzata una denominazione generale del tipo: "xilenolo".

In questo caso, il fabbricante o qualsiasi altra persona che immette tale sostanza sul mercato deve specificare sull'etichetta se si tratta di un isomero specifico a) o di una miscela di isomeri b).

Esempi: a) 2,4 dimetilfenolo

b) xilenolo (miscela di isomeri).

Nota D:

Talune sostanze che tendono spontaneamente alla polimerizzazione o decomposizione si riscontrano generalmente sul mercato sotto forma stabilizzata. È appunto sotto questa forma che sono elencate nell'allegato I della presente direttiva.

Tuttavia, tali sostanze sono a volte immesse in commercio sotto forma non stabilizzata. In questo caso il fabbricante o qualsiasi altra persona che le immette in commercio deve specificare sull'etichetta il nome della sostanza seguito dalla dicitura "non stabilizzata".

Esempio:

acido metacrilico (non stabilizzato).

Nota E:

Alle sostanze aventi effetti specifici sulla salute delle persone (cfr. capitolo 4 dell'allegato VI), classificate come cancerogene, mutagene e/o tossiche per il ciclo riproduttivo, appartenenti alle categorie 1 o 2, viene attribuita la nota E se sono classificate anche come altamente tossiche (T+), tossiche (T) o nocive (Xn). Per dette sostanze, le frasi di rischio R 20, R 21, R 22, R 23, R 24, R 25, R 26, R 27, R 28, R 39, R 40, R 48 e R 65 e tutte le combinazioni di queste frasi di rischio devono essere precedute dalla parola "anche".

Esempi: R 45-23 "Può causare il cancro. Anche tossico per inalazione."

R 46-27/28 "Può causare danni genetici ereditari. Anche altamente tossico a contatto con la pelle e per ingestione."

Nota F:

Questa sostanza può contenere stabilizzanti. Se lo stabilizzante modifica le caratteristiche di pericolosità della sostanza, specificate nell'etichetta prevista conformemente all'allegato I, l'etichetta deve essere predisposta secondo le regole di etichettatura dei preparati pericolosi.

Nota G:

Questa sostanza può essere immessa sul mercato in forma potenzialmente esplosiva; in tal caso dovrà essere valutata secondo metodi di saggio appropriati e provvista di etichetta che ne indichi le sue caratteristiche esplosive.

Nota H:

La classificazione e l'etichetta di questa sostanza concernono soltanto la o le proprietà pericolose specificate dalla o dalle frasi di rischio, in combinazione con la o le categorie di pericolo indicate. I requisiti di cui all'articolo 6 della presente direttiva relativi ai fabbricanti, ai distributori e agli importatori di questa sostanza si applicano a tutti gli altri aspetti di classificazione ed etichettatura. L'etichetta finale dev'essere conforme ai requisiti della sezione 7 dell'allegato VI della presente direttiva.

La presente nota si applica a talune sostanze derivate dal carbone e dal petrolio e a taluni gruppi di sostanze di cui all'allegato I.

Nota J:

La classificazione "cancerogeno" non è necessaria se si può dimostrare che la sostanza contiene benzene in percentuale inferiore allo 0,1 % di peso/peso (Einecs n. 200-753-7). La presente nota si applica soltanto a talune sostanze composte derivate dal carbone e dal petrolio contenute nell'allegato I.

Nota K:

La classificazione "cancerogeno" non è necessaria se si può dimostrare che la sostanza contiene 1,3-butadiene in percentuale inferiore allo 0,1 % di peso/peso (Einecs n. 203-450-8). Se la sostanza non è classificata come cancerogena, devono almeno comparire le frasi S (2-)-9-16. La presente nota si applica soltanto a talune sostanze composte derivate dal petrolio contenute nell'allegato I.

Nota L:

La classificazione "cancerogeno" non è necessaria se si può dimostrare che la sostanza contiene meno del 3 % di estratto di DMSO, secondo la misurazione IP 346. La presente nota si applica soltanto a talune sostanze composte derivate dal petrolio contenute nell'allegato I.

Nota M:

La classificazione "cancerogeno" non è necessaria se si può dimostrare che la sostanza contiene benzo[a]-pirene in percentuale inferiore allo 0,005 % di peso/peso (Einecs n. 200-028-5). La presente nota si applica soltanto a talune sostanze composte derivate dal carbone contenute nell'allegato I.

Nota N:

La classificazione "cancerogeno" non è necessaria se si conosce l'intero iter di raffinazione e si può dimostrare che la sostanza da cui il prodotto è derivato non è cancerogena. La presente nota si applica soltanto a talune sostanze composte derivate dal petrolio contenute nell'allegato I.

Nota P:

La classificazione "cancerogeno" non è necessaria se si può dimostrare che la sostanza contiene benzene in percentuale inferiore allo 0,1% di peso/peso (Einecs n. 200-753-7).

Se la sostanza è classificata come cancerogena, è necessaria anche la nota E.

Se la sostanza non è classificata come cancerogena, devono almeno comparire le frasi S (2-)23-24-62.

La presente nota si applica soltanto a talune sostanze composte derivate dal petrolio contenute nell'allegato I.

Nota Q:

La classificazione "cancerogeno" non si applica se è possibile dimostrare che la sostanza in questione rispetta una delle seguenti condizioni:

- una prova di persistenza biologica a breve termine mediante inalazione ha mostrato che le fibre di lunghezza superiore a 20 µm presentano un tempo di dimezzamento ponderato inferiore a 10 giorni;
oppure
- una prova di persistenza biologica a breve termine mediante instillazione intratracheale ha mostrato che le fibre di lunghezza superiore a 20 µm presentano un tempo di dimezzamento ponderato inferiore a 40 giorni;
oppure
- un'adeguata prova intraperitoneale non ha rivelato evidenza di un eccesso di cancerogenicità;
oppure
- una prova di inalazione appropriata a lungo termine ha dimostrato assenza di effetti patogeni significativi o alterazioni neoplastiche.

Nota R:

La classificazione "cancerogeno" non si applica alle fibre il cui diametro geometrico medio ponderato rispetto alla lunghezza, meno due errori standard, risulti superiore a 6 µm.

Nota S:

Per questa sostanza non è obbligatoria l'etichetta prescritta all'articolo 23. Cfr. sezione 8 dell'allegato VI.

Spiegazione delle note relative all'etichettatura dei preparati

In appresso è indicato il significato delle note che compaiono accanto ai limiti di concentrazione.

Nota 1:

Le concentrazioni indicate o, in loro assenza, le concentrazioni generali di cui alla direttiva 88/379/CEE sono espresse in percentuale del peso dell'elemento metallico, calcolato in base al peso totale del preparato.

Nota 2:

La concentrazione indicata di isocianato rappresenta la percentuale del peso del monomero libero, calcolato in base al peso totale del preparato.

Nota 3:

La concentrazione indicata è espressa in percentuale del peso degli ioni cromo dissolti in acqua, calcolato in base al peso totale del preparato.

Nota 4:

I preparati contenenti queste sostanze devono essere classificati come nocivi e contrassegnati dalla frase R 65 se rispondono ai criteri di cui al punto 3.2.3 dell'allegato VI.

Nota 5:

Per i preparati gassosi i limiti di concentrazione sono espressi in percentuale volume/volume.

Nota 6:

I preparati contenenti queste sostanze devono essere contrassegnati dalla frase R 67 se rispondono ai criteri di cui al punto 3.2.8 dell'allegato VI.»

Se compose d'hydrocarbures dont le nombre de carbones se situe principalement dans la gamme C₃-C₇ et dont le point d'ébullition est compris approximativement entre -40 °C et 80 °C.]
- IT: gas di petrolio, liquefatti, addolciti; Gas di petrolio
[Combinazione complessa di idrocarburi ottenuta sottoponendo una miscela di gas di petrolio liquefatti a un processo di addolcimento per la conversione dei mercaptani o per l'eliminazione delle impurezze acide. E costituita da idrocarburi con numero di atomi di carbonio nell'intervallo C₃-C₇ e punto di ebollizione nell'intervallo da -40 °C a 80 °C ca.]
- NL: aardoliegassen, vloeibaar gemaakt, stankvrij gemaakt; Petroleumgas
[Een complexe verzameling koolwaterstoffen, verkregen door het onderwerpen van een vloeibaar gemaakt aardoliegasmengsel aan een stankvrijmakingsproces, om mercaptanen om te zetten of zure onzuiverheden te verwijderen. Bestaat uit koolwaterstoffen, overwegend C₃ tot en met C₇, met een kooktraject van ongeveer -40 °C tot 80 °C.]
- PT: gases del petróleo, liquefeitos, tratados (sweetened); Gases de petróleo liquefeitos
[Uma combinação complexa de hidrocarbonetos obtida submetendo uma mistura de gases de petróleo liquefeitos a um processo de sweetening para converter mercaptans ou remover impurezas ácidas. E constituída por hidrocarbonetos com números de átomos de carbono predominantemente na gama de C₃ até C₇ e destila no intervalo de aproximadamente -40 °C a 80 °C.]
- FI: maaöljykaasut, nesteytettyt, makeutetut; Maaöljykaasu
[Monimutkainen seos hiilivetyjä, saatu nesteytetystä maaöljykaasuseoksesta hapettamalla merkaptaanit tai poistamalla happamat epäpuhtaudet makeutusprosessilla. Koostuu hiilivedyistä, joiden hiililuvut ovat pääasiassa välillä C₃:sta C₇:ään, ja jotka kiehuvat likimäärin välillä -40 °C:sta 80 °C:een (-40 °F:sta 176 °F:iin).]
- SV: petroleumgaser, flytande, sweetened
[Komplex blandning av kolväten erhållen genom avsvavling av en flytande petroleumgasblandning för att omvandla merkaptaner eller avlägsna sura föroreningar. Består av kolväten, främst C₃ till C₇, med ungefärligt kokpunktsintervall från -40 °C till 80 °C.]

ES: trementina, aceite

[Cualquiera de las fracciones terpénicas en su mayor parte volátiles o destilados resultantes de la extracción con disolventes de la goma o de la pasta de las maderas blandas. Compuestas principalmente de hidrocarburos terpénicos $C_{10}H_{16}$: α -pineno, β -pineno, limoneno, 3-careno y canfeno. Pueden contener otros terpenos acíclicos, monocíclicos o bicíclicos, terpenos oxigenados y anetol. La composición exacta varía con los métodos de refinado y la edad, localización y especie de la clase de madera blanda.]

DA: terpentint, olie; terpentint, vegetabilisk

[Enhver af de flygtige overvejende terpeniske fraktioner eller destillater fremkommet ved solventekstraktion af gummiindsamling fra, eller kvasning af, blødtæ. Består primært af $C_{10}H_{16}$ -terpencarbonhydriderne: α -pinen, β -pinen, limonen, 3-caren, camphen. Kan indeholde andre acycliske, monocycliske eller bicyclisketerpener, oxygenerede terpener og anethol. Nøjagtig sammensætning varierer med raffineringmetoder og alderen, lokalisering og arterne af blødtæskilden.]

DE: Terpentint, Öl

[Jede der flüchtigen, vorherrschend Terpen-, Fraktionen oder Destillate aus der Lösungsmittelextraktion, der Gummigewinnung oder beim Pulpen von Weichholz. Besteht in erster Linie aus den $C_{10}H_{16}$ Terpenkohlenwasserstoffen: α -Pinen, β -Pinen, Limonen, 3-Caren, Camphen. Kann andere acyclische, monocyclische oder bicyclische Terpene, oxygenierte Terpene und Anethol enthalten. Exakte Zusammensetzung variiert mit den Aufbereitungsverfahren und Alter, Ort und Art der Weichholzquelle.]

EL: τερεβινθέλαιο

[Όποιαδήποτε από τα πτητικά κυρίως τερπενικά κλάσματα ή αποστάγματα που προκύπτουν από την εκχύλιση με διαλύτη συλλογής κόμμεος ή πολλού μαλακών ξύλων. Αποτελείται πρωτίτως από τους $C_{10}H_{16}$ υδρογονάνθρακες τερπενίου: α -πινένιο, β -πινένιο, λεμονένιο, 3-καρένιο, καμφένιο. Μπορεί να περιέχουν άλλα άκυκλα, μονοκυκλικά ή δικυκλικά τερπένια, οξυγονωμένα τερπένια και ανηθόλη. Η ακριβής σύσταση ποικίλει με τις μεθόδους καθαρισμού και την ηλικία, τοποθεσία και το είδος της πηγής του μαλακού ξύλου.]

EN: Turpentine, oil

[Any of the volatile predominately terpenic fractions or distillates resulting from the solvent extraction of, gum collection from, or pulping of softwoods. Composed primarily of the $C_{10}H_{16}$ terpene hydrocarbons: α -pinene, β -pinene, limonene, 3-carene, camphene. May contain other acyclic, monocyclic, or bicyclic terpenes, oxygenated terpenes, and anethole. Exact composition varies with refining methods and the age, location, and species of the softwood source.]

FR: essence de térébenthine

[Toute fraction ou distillat volatil à dominante terpénique obtenu par extraction au solvant, collecte des sucs ou réduction en pâte de bois tendre. Se compose principalement d'hydrocarbures terpéniques $C_{10}H_{16}$: α -pinène, β -pinène, limonène, carene-3 et camphène. Peut contenir d'autres terpènes acycliques, monocycliques ou bicycliques, des terpènes oxygénés et de l'anéthol. La composition exacte varie avec les méthodes de raffinage et l'âge, l'origine géographique et l'espèce des arbres dont le bois est utilisé.]

IT: trementina, olio

[Una qualsiasi delle frazioni terpeniche prevalentemente volatili o dei distillati ottenuti dal legno di conifere per estrazione con solventi, o con la raccolta della resina, o dalla trasformazione del legno in pasta. E composta principalmente dagli idrocarburi terpenici $C_{10}H_{16}$: α -pinene, β -pinene, limonene, 3-carene, canfene. Può contenere altri terpeni aciclici, monociclici o biciclici, terpeni ossigenati ed anetolo. La composizione esatta varia con i metodi di raffinazione e con l'età, la provenienza e la specie di legno di conifere usato.]

NL: terpentijn, olie

[Elk van de vluchtige, voornamelijk terpenen bevattende, fracties of destillaten verkregen door extractie met oplosmiddelen van, gomwinning uit of in brijvorm brengen van zachthout. Voornamelijk samengesteld uit de $C_{10}H_{16}$ -terpeenkolwaterstoffen: α -pinen, β -pinen, limoneen, 3-careen, kamfeen. Kan andere acyclische, monocyclische of bicyclische terpenen, geoxygeneerde terpenen, en anethool bevatten. Exacte samenstelling varieert met zuiveringsmethoden en de leeftijd, herkomst en species van de zachthoutbron.]

PT: essência de terebentina; aguarrás

[Qualquer das fracções voláteis predominantemente terpénicas ou destilados resultantes da extracção com solvente de madeira de resinosas, recolha de colofónia de resinosas, ou produção de pasta a partir de madeira de resinosas. E constituída principalmente por hidrocarbonetos terpénicos $C_{10}H_{16}$: α -pineno, β -pineno, limoneno, 3-careno, canfeno. Por conter outros terpenos acíclicos, monocíclicos, ou bicíclicos, terpenos oxigenados, e anetole. A composição exacta varia com os métodos de refinação e a idade, origem geográfica, e espécie de resinosa.]

FI: tärpätti, öljy

[Jokainen haihtuva etupäässä terpeenifraktio tai tisle, joka saadaan liuotinuutolla havupuun pihkan tai sellun tuotannosta. Muodostuu pääasiassa $C_{10}H_{16}$ terpeenihiilivedyistä: α -pineeni, β -pineeni, limoneeni, 3-kareeni, kamfeeni. Voi sisältää muita asyklisiä, monosyklisiä tai bisyklisiä terpeenejä, hapettuneita terpeenejä ja anetolia. Tarkka koostumus vaihtelee jalostusmenetelmien sekä havupuun iän, sijaintipaikan ja lajin mukaan.]

SV: terpent

[Någon av de flyktiga fraktioner eller destillat, huvudsakligen innehållande terpen, från solventextraktion av, hartsinsamling från eller massaframställning av mjuka träslag. Består huvudsakligen av $C_{10}H_{16}$ -terpenkolväten: α -pinen, β -pinen, limonen, 3-karen, kamfen. Kan innehålla andra acykliska, monocykliska eller bicykliska terpen, oxiderade terpen och anetol. Exakt sammansättning varierar med reningsmetod och ålder, plats och art av mjukträråvara.]

- DA: Må ikke tømmes i kloakfløb; stoffet og emballagen skal bortskaffes på en sikker måde
- DE: Nicht in die Kanalisation gelangen lassen; Abfälle und Behälter müssen in gesicherter Weise beseitigt werden
- EL: Μην αδειάζετε το υπόλοιπο του περιεχομένου στην αποχέτευση· διαθέστε αυτό το υλικό και τον περιέκτη του κατά ασφαλή τρόπο
- EN: Do not empty into drains; dispose of this material and its container in a safe way
- FR: Ne pas jeter les résidus à l'égout; ne se débarrasser de ce produit et de son récipient qu'en prenant toutes les précautions d'usage
- IT: Non gettare i residui nelle fognature; non disfarsi del prodotto e del recipiente se non con le dovute precauzioni
- NL: Afval niet in de gootsteen werpen; stof en verpakking op veilige wijze afvoeren
- PT: Não deitar os resíduos no esgoto; não eliminar o produto e o seu recipiente sem tomar as precauções de segurança devidas
- FI: Ei saa tyhjentää viemäriin; hävitä tämä aine ja sen pakkaus turvallisesti
- SV: Töm ej i avloppet, oskadliggör produkt och förpackning på säkert sätt

ALLEGATO 4

«1.6. **Nel caso delle sostanze i dati per la classificazione e l'etichettatura sono ottenuti come segue:**

- a) per le sostanze per le quali occorre fornire le informazioni specificate nell'allegato VII la maggior parte dei dati necessari per la classificazione e l'etichettatura sono contenuti nel "fascicolo di base". La classificazione e l'etichettatura verranno rivedute, se necessario, quando saranno disponibili nuove informazioni (allegato VIII);
- b) per quanto riguarda le altre sostanze (ad esempio quelle di cui al punto 1.5 precedente) i dati necessari per la classificazione e l'etichettatura potranno essere eventualmente ricavati da numerose altre fonti, tra cui i risultati di precedenti prove, le informazioni richieste in applicazione delle norme internazionali sul trasporto delle sostanze pericolose, le informazioni tratte da opere di consultazione e da pubblicazioni specializzate e i dati basati sull'esperienza. Se di pertinenza, possono essere presi in considerazione anche i risultati convalidati delle interrelazioni tra struttura e attività e i pareri degli esperti.

Nel caso dei preparati i dati per la classificazione e l'etichettatura sono ottenuti come segue:

- a) i dati fisico-chimici si ottengono applicando i metodi specificati nell'allegato V. Per i preparati gassosi si può impiegare un metodo di calcolo delle proprietà di comburenza ed infiammabilità (cfr. capitolo 9);
- b) i dati concernenti gli effetti sulla salute si ottengono:
 - applicando i metodi specificati nell'allegato V e/o applicando il metodo convenzionale di cui all'articolo 3, paragrafo 5, lettere da a) a i) della direttiva 88/379/CEE, oppure, in caso di R 65, applicando i criteri di cui al punto 3.2.3;
 - per quanto concerne la valutazione degli effetti cancerogeni, mutageni e di tossicità riproduttiva, invece, applicando il metodo convenzionale di cui all'articolo 3, paragrafo 5, lettere da j) a q), della direttiva 88/379/CEE.

Nota relativa alla sperimentazione su animali

L'esecuzione di test sugli animali per ottenere dati sperimentali è soggetta alle disposizioni della direttiva 86/609/CEE concernente la protezione degli animali impiegati a scopi sperimentali.»

«1.7.2. *Applicazione dei criteri orientativi per le sostanze*

I criteri orientativi illustrati nel presente allegato sono direttamente applicabili se i dati in questione sono stati ottenuti con metodi di saggio paragonabili a quelli esposti nell'allegato V, altrimenti i dati disponibili devono essere valutati confrontando i metodi di saggio utilizzati con quelli dell'allegato V e con le norme contenute nel presente allegato per definire la corretta classificazione ed etichettatura.

In alcuni casi potrebbero sorgere dubbi circa l'applicazione dei criteri più pertinenti, specialmente laddove occorra il giudizio di un esperto. In detti casi il fabbricante, il distributore o l'importatore classifica ed etichetta la sostanza a titolo provvisorio in base ad una valutazione delle caratteristiche evidenti ad opera di una persona competente.

Fatto salvo l'articolo 6, laddove sia stata applicata la procedura di cui sopra e si temano possibili incongruenze, può essere presentata una proposta di inserimento della classificazione provvisoria nell'allegato I. Tale proposta deve essere presentata ad uno degli Stati membri e corredata di opportuni riscontri scientifici (cfr. anche il punto 4.1).

Analoga procedura si applica qualora siano state reperite informazioni che sollevano dubbi circa l'accuratezza di una voce già inserita nell'allegato I.»

«2.2.2.1. Osservazioni concernenti i perossidi organici

In riferimento alle proprietà esplosive, un perossido organico o un preparato a base di un perossido organico nella forma con cui viene immesso sul mercato è classificato secondo i criteri di cui al punto 2.2.1 in base a test condotti seguendo i metodi descritti nell'allegato V.

In riferimento alle proprietà comburenti, gli attuali metodi di cui all'allegato V non possono essere applicati ai perossidi organici.

Per le sostanze, i perossidi organici non ancora classificati come esplosivi sono classificati come pericolosi in base alla loro struttura (ad esempio R-O-O-H; R₁-O-O-R₂).

I preparati non ancora classificati come esplosivi sono classificati utilizzando il metodo di calcolo basato sulla percentuale di ossigeno attivo illustrato al punto 9.5.

Qualunque perossido organico o preparato contenente perossido organico non ancora classificato come esplosivo è classificato come comburente se il perossido o la sua formulazione contengono:

- più del 5 % di perossidi organici, oppure
- più dello 0,5 % di ossigeno disponibile dai perossidi organici e più del 5 % di perossido di idrogeno.»

«3.2.3. Nocivo

R 65 Nocivo: può causare danni ai polmoni in caso di ingestione

Le sostanze e i preparati liquidi che presentano per l'uomo un rischio di aspirazione data la loro ridotta viscosità:

a) le sostanze e i preparati che contengono idrocarburi alifatici, aliciclici e aromatici in concentrazione totale pari o superiore al 10 % e che presentano:

- un tempo di scorrimento inferiore a 30 secondi in una vaschetta ISO di 3 mm, conformemente alla norma ISO 2431, oppure
- una viscosità cinematica inferiore a 7×10^{-6} m²/sec a 40 °C, misurata in un viscosimetro a capillare calibrato in vetro conformemente alla norma ISO 3104/3105, oppure
- una viscosità cinematica inferiore a 7×10^{-6} m²/sec a 40 °C, dedotta dalla misurazione della viscosità di rotazione conformemente alla norma ISO 3219.

Nota: Le sostanze e i preparati conformi a questi criteri non devono essere classificati se la tensione superficiale media, misurata mediante tensiometro "du Nuoy" o con i metodi di cui all'allegato V, parte A.5, è superiore a 33 mN/m a 25 °C;

b) le sostanze e i preparati risultati nocivi per l'uomo in base all'esperienza pratica.

3.2.3.1. Osservazioni riguardanti le sostanze volatili

Per alcune sostanze ad alta concentrazione di vapore saturo possono essere disponibili dati che rivelino effetti potenzialmente sospetti. Tali sostanze possono non essere classificate in base ai criteri riferiti agli effetti sulla salute di cui al punto 3.2.3, né essere contemplate al punto 3.2.8. Tuttavia, in presenza di opportuni dati che dimostrino il possibile rischio legato alla manipolazione e all'uso normali di tali sostanze, può essere necessario classificarle, caso per caso, nell'allegato I.»

«3.2.6.1. Infiammazione della pelle

Le seguenti frasi di rischio saranno assegnate in base ai criteri indicati:

R 38 Irritante per la pelle

- sostanze e preparati che provocano notevole infiammazione della pelle che persista per almeno 24 ore dopo un periodo massimo di esposizione di 4 ore in base a studi condotti su conigli con il test di irritazione cutanea di cui all'allegato V.

L'infiammazione della pelle è notevole se:

- a) la media dei valori di punteggio dell'eritema e dell'escara o della formazione di un edema, calcolata in tutti gli animali testati, è pari o superiore a 2,
- b) ovvero, quando al test di cui all'allegato V effettuato su tre animali si osservi in almeno due animali eritema ed escara o edema di valore medio pari o superiore a 2 calcolato per ciascun animale separatamente.

In entrambi i casi per calcolare i rispettivi valori medi si utilizzano tutti i valori del punteggio relativi ad ognuno dei tempi di rilevazione degli effetti (24, 48, 72 ore).

L'infiammazione della pelle è notevole anche quando persiste in almeno due animali al termine del periodo di osservazione. Sono da prendere in considerazione effetti particolari quali iperplasia, desquamazione, decolorazione, fissurazione, formazione di croste e alopecia.

Possono essere disponibili anche i risultati di studi su animali non acuti [cfr. osservazioni su R 48 al punto 2, lettera d)], da ritenere significativi se gli effetti osservati sono paragonabili a quelli appena descritti.

- sostanze e preparati che provocano notevole infiammazione della pelle a seguito di contatto immediato, prolungato o ripetuto, in base ad osservazioni pratiche effettuate sull'uomo.
- perossidi organici, tranne nei casi in cui si ha la prova del contrario.

Parestesie

Le parestesie osservate sull'uomo provocate dal contatto della pelle con antiparassitari piretroidi non sono considerate alla stregua di effetti irritanti classificabili come Xi; R 38. Per le sostanze di cui si sono osservati simili effetti dovrebbe comunque essere utilizzata la frase S 24.»

«3.2.8. Altre proprietà tossicologiche

Ulteriori frasi di indicazione dei rischi saranno assegnate, conformemente ai seguenti criteri (basati sulle esperienze acquisite in fase di compilazione dell'allegato I), a sostanze e preparati classificati in base ai principi di cui ai punti da 2.2.1 a 3.2.7 e/o ai capitoli 4 e 5.

R 66 L'esposizione dei vapori può provocare secchezza e screpolature della pelle

Sostanze e preparati da considerare con sospetto perché potrebbero provocare disseccamento cutaneo, esfoliazione o screpolature, pur non corrispondendo ai criteri di classificazione R 38,

in base a:

- osservazioni pratiche dopo uso e manipolazione normali, o
- prove evidenti circa gli effetti previsti riscontrati sulla pelle.

Cfr. anche i punti 1.6 e 1.7.

R 67 L'inalazione dei vapori può provocare sonnolenza e vertigini

Sostanze e preparati volatili contenenti tali sostanze che provocano evidente depressione delle funzioni del sistema nervoso centrale a seguito di inalazione e che non sono ancora classificate in termini di tossicità acuta per inalazione (R 20, R 23, R 26, R 40/20, R 39/23 o R 39/26).

Possono essere utilizzati i seguenti dati:

a) Dati ottenuti con la sperimentazione animale che mostrino chiari segni di depressione del sistema nervoso centrale, tra cui effetti narcotici, letargia, mancanza di coordinazione (inclusa la perdita del riflesso di raddrizzamento) e atassia

— a concentrazioni o con tempi di esposizione inferiori o pari a 20 mg/l/4 ore, oppure

— laddove il rapporto tra la concentrazione alla quale si produce l'effetto entro 4 ore e la concentrazione di vapore saturo (CVS) a 20 °C sia inferiore a 1/10.

b) Osservazioni pratiche sull'uomo (ad esempio narcosi, sopore, caduta della vigilanza, perdita dei riflessi, mancanza di coordinazione, vertigini) debitamente documentate, a condizioni di esposizione equivalenti agli effetti summenzionati riferiti alla sperimentazione animale.

Cfr. anche i punti 1.6 e 1.7.

Per ulteriori frasi di rischio cfr. il punto 2.2.6.»

«4.1.2. Il fabbricante, distributore o importatore che disponga di informazioni secondo cui una sostanza dovrebbe essere classificata ed etichettata in conformità dei criteri di cui ai punti 4.2.1, 4.2.2 o 4.2.3, potrà etichettarla a titolo provvisorio conformemente ai suddetti criteri, in base ad una valutazione dei riscontri evidenti ad opera di una persona competente.

4.1.3. Il fabbricante, distributore o importatore dovrà presentare il più rapidamente possibile allo Stato membro nel quale la sostanza è immessa sul mercato un documento che contenga tutte le informazioni sull'argomento. Questo documento deve contenere una bibliografia con tutti i necessari riferimenti e può includere eventuali dati non pubblicati.

4.1.4. Inoltre, il fabbricante, distributore o importatore in possesso di nuovi dati relativi alla classificazione e all'etichettatura di una sostanza in conformità dei criteri di cui ai punti 4.2.1, 4.2.2 o 4.2.3 è tenuto a presentarli il più rapidamente possibile allo Stato membro nel quale la sostanza è immessa sul mercato.»

«5.2.2. Ambiente non acquatico

5.2.2.1. Le sostanze saranno classificate come pericolose per l'ambiente e contrassegnate con il simbolo "N" e l'opportuna indicazione di pericolo; ad esse saranno attribuite le frasi di rischio in conformità dei seguenti criteri:

R 54 Tossico per la flora

R 55 Tossico per la fauna

R 56 Tossico per gli organismi del terreno

R 57 Tossico per le api

R 58 Può provocare a lungo termine effetti negativi per l'ambiente

Sostanze che in base alle prove disponibili circa le loro proprietà, la persistenza, il potenziale di bioaccumulo, nonché il destino e il comportamento ambientali presunti o osservati, possono presentare un pericolo immediato, a lungo termine e/o ritardato per la struttura e/o il funzionamento degli ecosistemi naturali, esclusi quelli descritti al punto 5.2.1. I criteri dettagliati saranno elaborati in seguito.

- 5.2.2.2. Le sostanze saranno classificate come pericolose per l'ambiente e contrassegnate con il simbolo "N" e l'opportuna indicazione di pericolo; ad esse saranno attribuite le frasi di rischio in conformità dei seguenti criteri:

R 59 Pericoloso per lo strato di ozono

Sostanze che, in base alle prove disponibili circa le loro proprietà e il destino e comportamento ambientali presunti o osservati, possono presentare un pericolo per la struttura e/o il funzionamento dello strato di ozono della stratosfera, comprese le sostanze elencate nell'allegato I del regolamento (CE) n. 3093/94 del Consiglio sulle sostanze che riducono lo strato di ozono (GU L 333 del 22.12.1994, pag. 1) e successive modifiche.»

«6.2. **Frasi relative ai consigli di prudenza per le sostanze e i preparati**

S 24 Evitare il contatto con la pelle

— Campo d'applicazione:

— tutte le sostanze e i preparati pericolosi per la salute.

— Criteri d'impiego:

— *obbligatoria* per le sostanze e i preparati cui è stata assegnata la frase R 43 tranne se è stata anche assegnata la frase S 36;

— raccomandata quando occorre richiamare l'attenzione dell'utilizzatore sui pericoli che comporta un contatto con la pelle, non menzionati nelle frasi di rischio da assegnare (ad esempio parestesie). Tuttavia, può essere utilizzata per dare maggior risalto a tali frasi di rischio.

S 25 Evitare il contatto con gli occhi

— Campo d'applicazione:

— tutte le sostanze e i preparati pericolosi per la salute.

— Criteri d'impiego:

— raccomandata quando occorre richiamare l'attenzione dell'utilizzatore sui pericoli che comporta un contatto con gli occhi, non menzionati nelle frasi di rischio da utilizzare. Tuttavia, può essere utilizzata per dare maggior risalto a tali frasi di rischio;

— raccomandata per le sostanze di uso corrente cui sono state assegnate le frasi R 34, R 35, R 36 o R 41.

S 27 Togliersi di dosso immediatamente gli indumenti contaminati

— Campo d'applicazione:

— sostanze e preparati altamente tossici, tossici o corrosivi.

— Criteri d'impiego:

— *obbligatoria* per le sostanze e i preparati altamente tossici di uso corrente cui è stata assegnata la frase R 27;

— raccomandata per le sostanze e i preparati altamente tossici destinati ad usi industriali cui è stata assegnata la frase R 27. Non usare questa frase se è stata assegnata la frase S 36;

— raccomandata per le sostanze e i preparati tossici cui è stata assegnata la frase R 24 e per le sostanze e i preparati corrosivi di uso corrente.

S 28 In caso di contatto con la pelle lavarsi immediatamente e abbondantemente con ... (prodotti idonei indicati dal fabbricante)

— Campo d'applicazione:

— sostanze e preparati altamente tossici, tossici o corrosivi.

- Criteri d'impiego:
 - *obbligatoria* per le sostanze e i preparati altamente tossici;
 - raccomandata per altre sostanze e preparati sopra menzionati, in particolare quando l'acqua non rappresenta il fluido di lavaggio più appropriato;
 - raccomandata per sostanze e preparati corrosivi di uso corrente.

S 29 Non gettare i residui nelle fognature

- Campo d'applicazione:
 - liquidi estremamente o facilmente infiammabili immiscibili con acqua;
 - sostanze e preparati altamente tossici e tossici;
 - sostanze pericolose per l'ambiente.
- Criteri d'impiego:
 - *obbligatoria* per sostanze e preparati pericolosi per l'ambiente, cui è stato attribuito il simbolo "N" e di uso corrente, a meno che non espressamente destinate a tale uso;
 - raccomandata per altre sostanze e preparati di cui sopra e di uso corrente, a meno che non espressamente destinati a tale uso.

S 35 Non disfarsi del prodotto e del recipiente se non con le dovute precauzioni

- Campo d'applicazione:
 - tutte le sostanze e i preparati pericolosi.
- Criteri d'impiego:
 - raccomandata per le sostanze e i preparati che necessitano di istruzioni particolari per garantirne il corretto smaltimento.

S 37 Usare guanti adatti

- Campo d'applicazione:
 - sostanze e preparati altamente tossici, tossici, nocivi o corrosivi;
 - perossidi organici;
 - sostanze e preparati irritanti per la pelle o che provocano sensibilizzazione a contatto con la pelle.
- Criteri d'impiego:
 - *obbligatoria* per le sostanze e i preparati altamente tossici e corrosivi;
 - *obbligatoria* per le sostanze e i preparati cui sono state assegnate le frasi R 21, R 24 o R 43;
 - *obbligatoria* per le sostanze cancerogene della categoria 3 e quelle mutagene e tossiche per la riproduzione, tranne se gli effetti si producono esclusivamente a seguito di inalazione;
 - *obbligatoria* per i perossidi organici;
 - raccomandata per sostanze e preparati tossici se il valore dermico LD₅₀ non è noto ma la sostanza o il preparato potrebbero essere nocivi a contatto con la pelle;
 - raccomandata per sostanze e preparati irritanti per la pelle.

S 45 In caso di incidente o malessere consultare immediatamente il medico (possibilmente mostrandogli l'etichetta)

- Campo d'applicazione:
 - sostanze e preparati altamente tossici;
 - sostanze e preparati tossici e corrosivi;
 - sostanze e preparati che provocano sensibilizzazione se inalati.
- Criteri d'impiego:
 - *obbligatoria* per le sostanze e i preparati di cui sopra.

S 56 Smaltire questo materiale e i relativi contenitori in un punto di raccolta rifiuti pericolosi o speciali

- Campo d'applicazione:
 - tutte le sostanze e i preparati pericolosi.
- Criteri d'impiego:
 - raccomandata per tutte le sostanze e i preparati pericolosi di uso corrente che richiedono metodi speciali di smaltimento.

S 59 Richiedere informazioni al produttore o fornitore per il recupero/riciclaggio

- Campo d'applicazione:
 - tutte le sostanze e i preparati pericolosi.
- Criteri d'impiego:
 - *obbligatoria* per le sostanze pericolose per lo strato di ozono;
 - raccomandata per altre sostanze e preparati per cui si raccomanda il recupero o il riciclo.

S 60 Questo materiale e il suo contenitore devono essere smaltiti come rifiuti pericolosi

- Campo d'applicazione:
 - tutte le sostanze e i preparati pericolosi.
- Criteri d'impiego:
 - raccomandata per sostanze e preparati non di uso corrente, cui non è stata attribuita la frase S 35.

S 62 In caso di ingestione, non provocare il vomito: consultare immediatamente un medico e mostrargli l'imballaggio o l'etichetta

- Campo d'applicazione:
 - sostanze e preparati classificati come nocivi e caratterizzati dalla frase R 65 conformemente ai criteri di cui al punto 3.2.3;
 - non applicabile alle sostanze e ai preparati immessi sul mercato in contenitori aerosol (o in contenitori muniti di un dispositivo sigillato di nebulizzazione); cfr. sezioni 8 e 9.
- Criteri d'impiego:
 - *obbligatoria* per le sostanze e i preparati sopra menzionati se venduti al pubblico o comunque di uso corrente, salvo quando sono obbligatorie le frasi S 45 o S 46;
 - raccomandata per le sostanze e i preparati sopra menzionati se usati nell'industria, salvo quando sono obbligatorie le frasi S 45 o S 46.

S 63 In caso di incidente per inalazione, allontanare l'infortunato dalla zona contaminata e mantenerlo a riposo

- Campo d'applicazione:
 - sostanze e preparati altamente tossici e tossici (gas, vapori, particelle, liquidi volatili);
 - sostanze e preparati che provocano sensibilizzazione delle vie respiratorie.

- Criteri d'impiego:
 - *obbligatoria* per le sostanze e i preparati cui sono state assegnate le frasi R 26, R 23 o R 24 e che vengono correntemente utilizzati in maniera da poter essere accidentalmente inalati.

S 64 In caso di ingestione sciacquare la bocca con acqua (solamente se l'infortunato è cosciente)

- Campo d'applicazione:
 - sostanze e preparati corrosivi o irritanti.
- Criteri d'impiego:
 - raccomandata per le sostanze e i preparati sopra menzionati di uso corrente e quando il trattamento indicato è possibile.»

«7.5.2. *Scelta dei consigli di prudenza*

La scelta finale delle frasi relative ai consigli di prudenza deve tenere conto delle frasi di rischio riportate sulle etichette e del previsto uso della sostanza o del preparato:

- in linea generale, saranno sufficienti quattro frasi S per formulare i consigli di prudenza più adeguati; in particolare, le combinazioni di frasi elencate nell'allegato IV sono considerate come una sola frase;
- per le frasi S relative allo smaltimento si utilizza un'unica frase, salvo quando risulti evidente che lo smaltimento del materiale e dei relativi contenitori non comporta alcun pericolo per la salute umana o l'ambiente; in particolare, è importante fornire indicazioni circa le modalità di smaltimento sicuro per le sostanze e i preparati in vendita al dettaglio;
- alcune frasi R diventano superflue operando un'attenta selezione delle frasi S e viceversa; le frasi S che chiaramente corrispondono a frasi R figureranno sull'etichetta soltanto se si intende sottolineare una determinata avvertenza;
- nella scelta dei consigli di prudenza occorre prestare particolare attenzione alle previste condizioni di utilizzazione di alcune sostanze e preparati, ad esempio l'applicazione a spruzzo o altri effetti aerosol; le frasi vanno scelte tenendo presente l'utilizzazione prevista;
- i consigli di prudenza S 1, S 2 e S 45 sono *obbligatorie* per tutte le sostanze e i preparati altamente tossici, tossici e corrosivi in vendita al dettaglio;
- i consigli di prudenza S 2 e S 46 sono *obbligatorie* per tutte le altre sostanze pericolose e gli altri preparati (eccetto quelli classificati come pericolosi soltanto per l'ambiente) in vendita al dettaglio.

Qualora le frasi selezionate in base ai criteri rigorosi di cui al punto 6.2 risultassero ridondanti, ambigue o chiaramente superflue in considerazione del prodotto o dell'imballaggio, se ne possono omettere alcune.»

«8. CASI PARTICOLARI: Sostanze

8.3. **Metalli in forma massiva**

Queste sostanze sono classificate nell'allegato I o devono essere classificate in conformità dell'articolo 6. Tuttavia, talune di queste sostanze, anche se classificate in conformità dell'articolo 2, non rappresentano un pericolo per la salute a seguito di inalazione, ingestione o contatto con la pelle o per l'ambiente acquatico nella forma in cui vengono immesse in commercio. Tali sostanze non richiedono un'etichetta in conformità dell'articolo 23. Tuttavia, la persona responsabile dell'immissione in commercio di un determinato metallo deve trasmettere all'utilizzatore tutte le informazioni che avrebbero dovuto figurare sull'etichetta nella forma prevista all'articolo 27.»
