PRINCIPLE OF MULTIPLEXE O80 PCR

**100% O80:H2 STEC ST301
(137/137) Mel -**

Non O80 STEC : 95% (333/352) : Mel (+)

5 % (19/352) : Mel (-)

Bizot et al., 2021

somatic antigen O

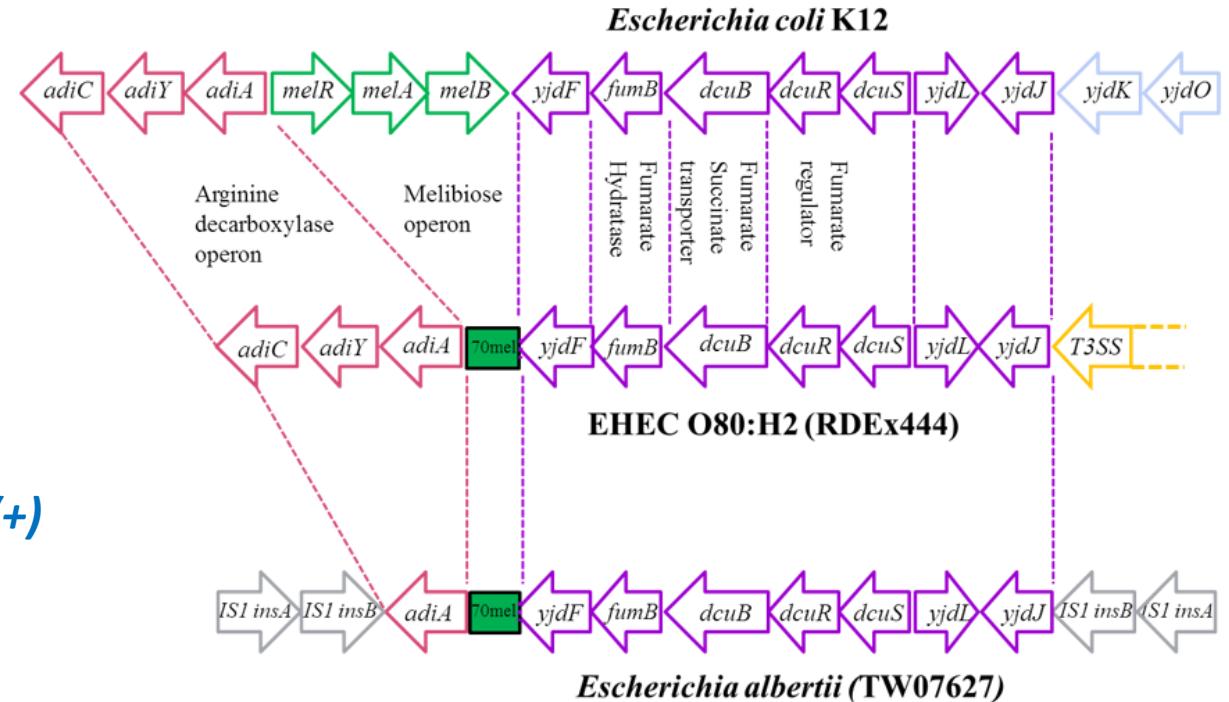

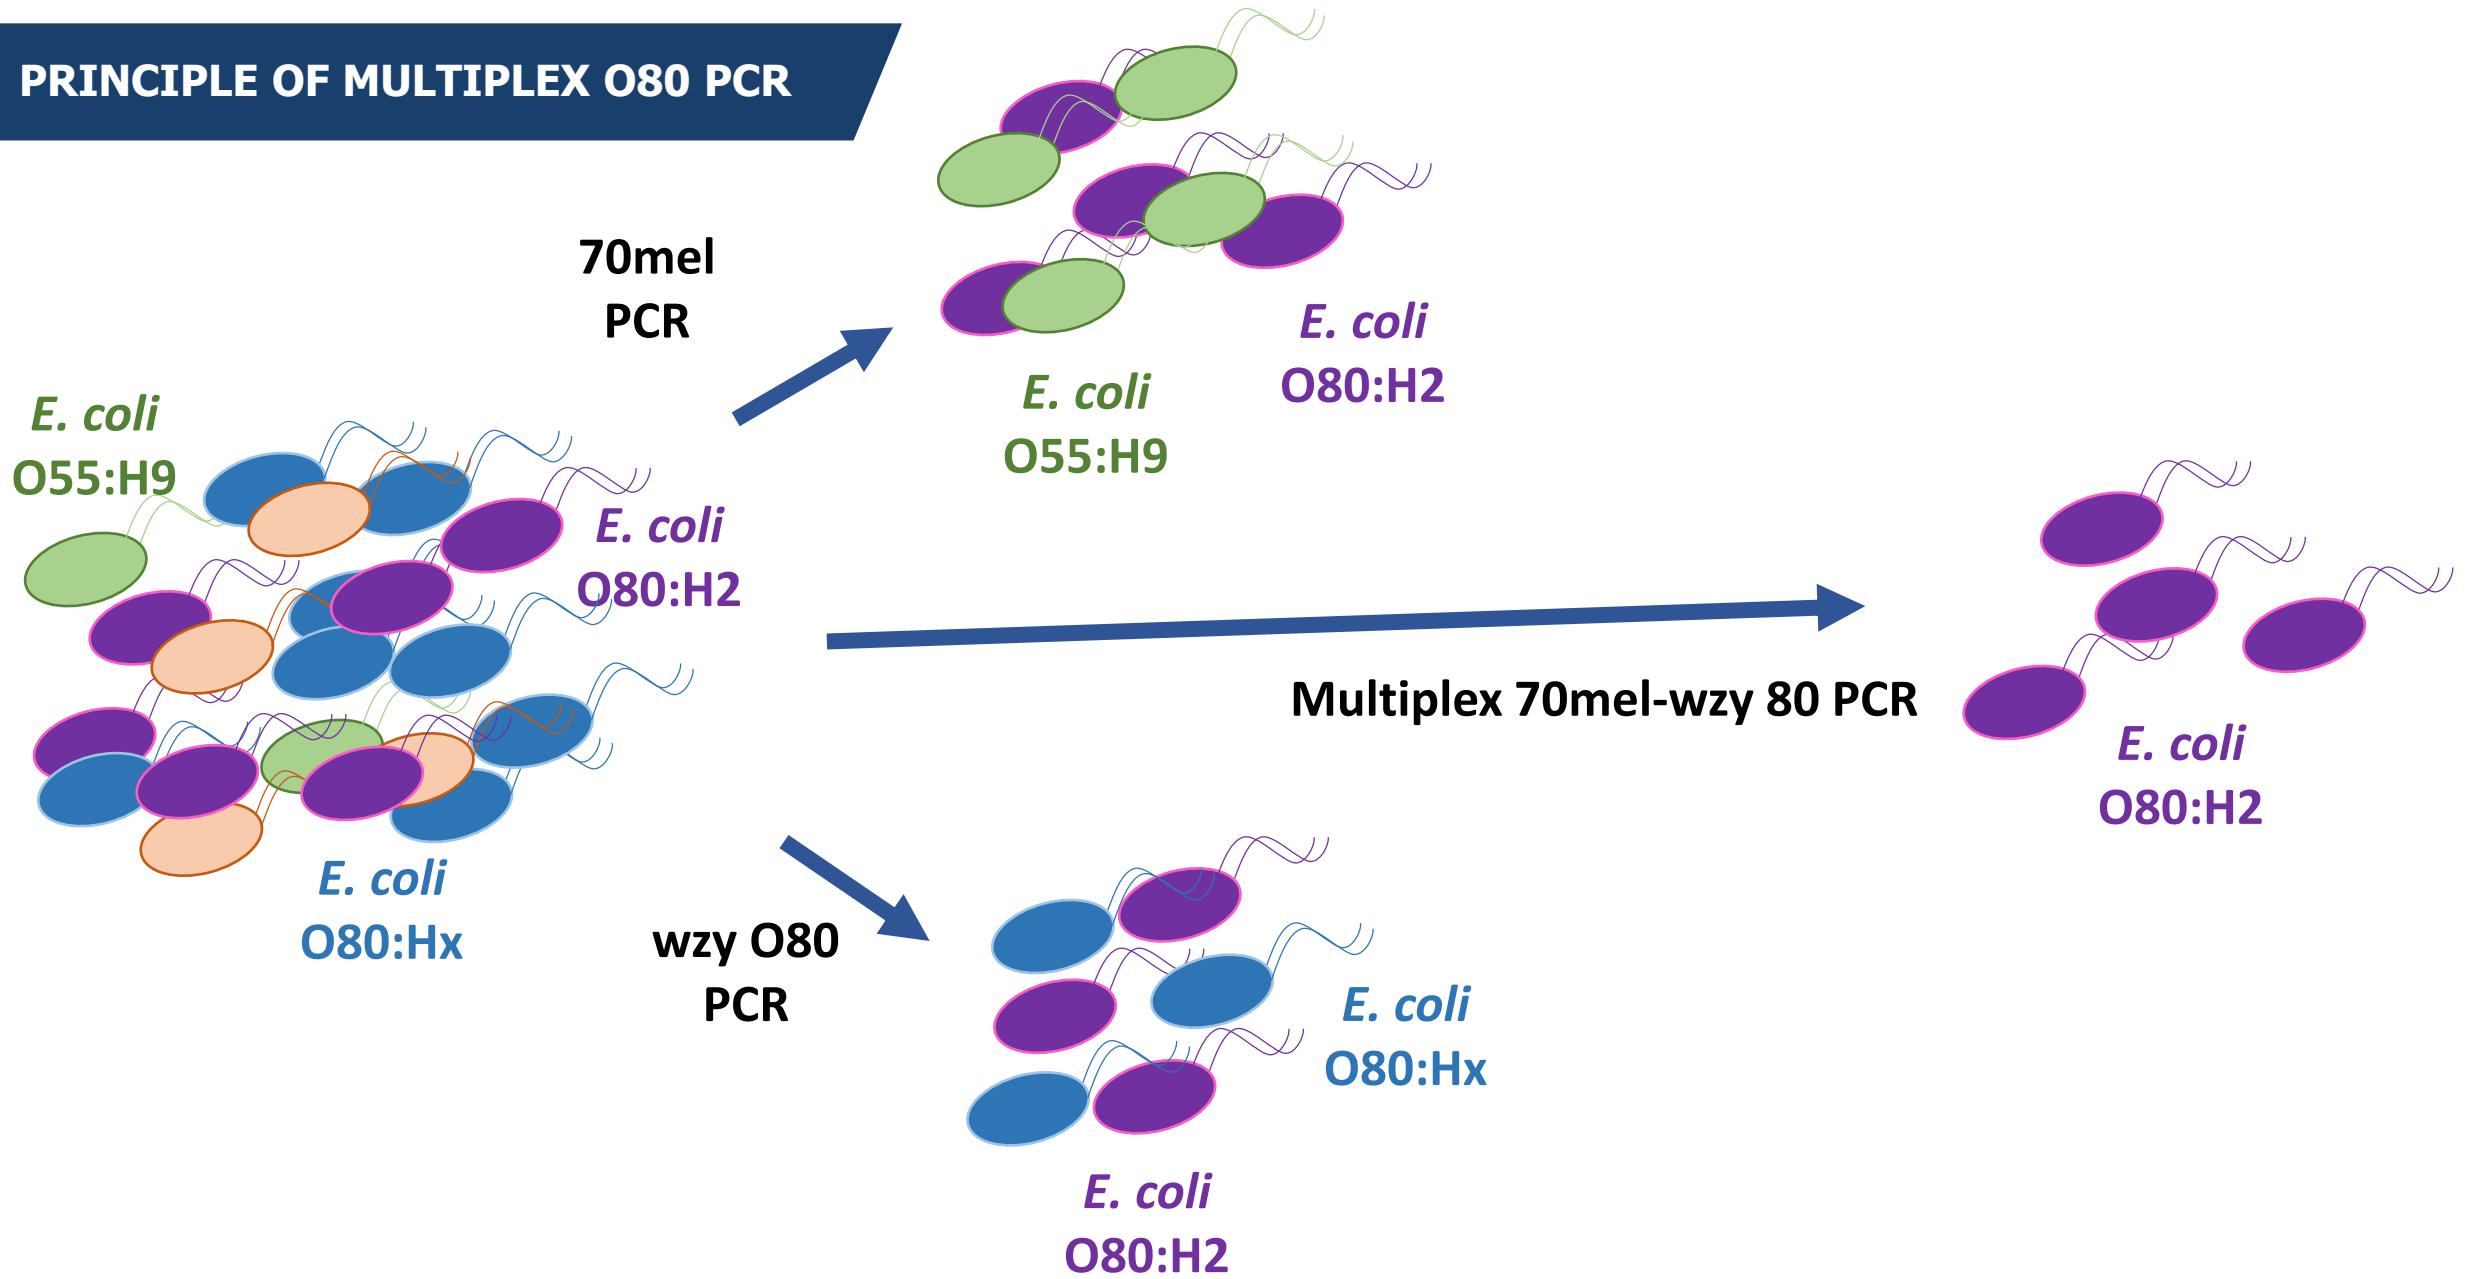

Figure 1. Genetic organization comparison of the melibiose operon and its flanking regions between *Escherichia coli* K12, a representative of O80:H2 EHEC clone (RDEEx444) and *Escherichia albertii*.

PRINCIPLE OF MULTIPLEX O80 PCR

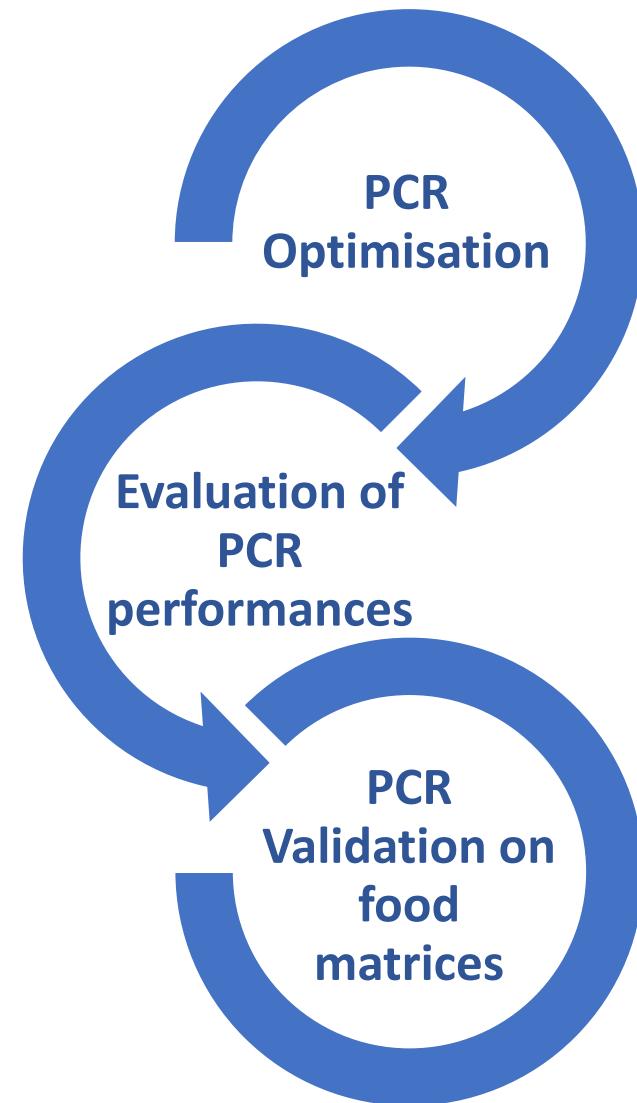

Point
1

The aim of this study was to develop a multiplex RT-PCR assay with Taqman® technology for the detection of *E. coli* O80:H2 in different food samples

Point
2

The method had to be specific, sensitive for *E. coli* O80:H2, rapid, robust

Multiplex real-time PCR O80:H2 development

Primers and probes design

✓ Work bases:

- **wzyO80**: Targets the wall lipoprotein characteristic of serogroup O80.

Igushi et al 2015

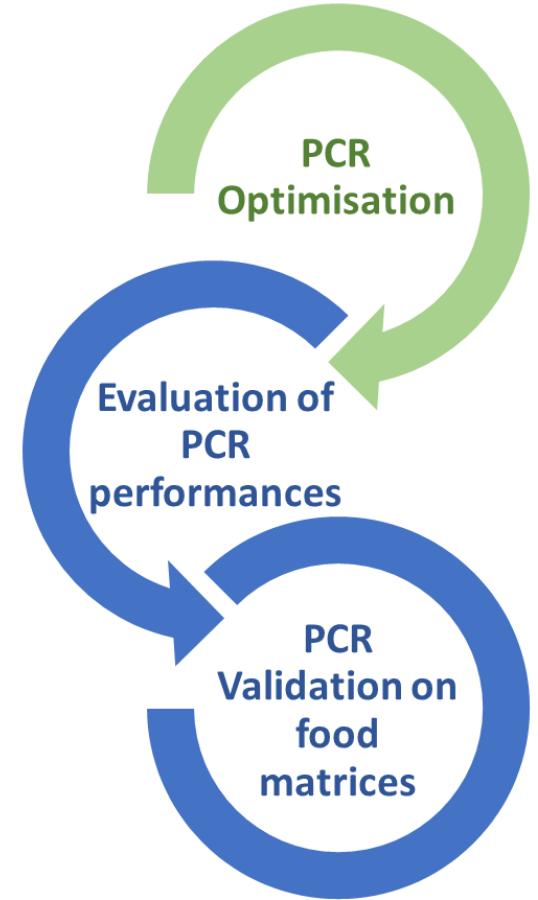

O80	wzy	Og80-PCR_F	TGGTGTGATTCCACTAGCGT
		Og80-PCR_R	CGAGAGTACCTGGTTCCAAA

- **70mel**: Deletion of melebiose operon with insertion of a 70pb sequence characteristic of ST301 (O80:H2, O55:H9....) *Bizot et al. 2021*

O80:H2 Mel	ΔMEL-F	AGGCCAGAAGTGTCAATCT
	ΔMEL-R	TCAGGCTGTAAAGCGCATGA

✓ Design Primers and probes => [genescript.com](https://www.genescript.com) platform

Target gene	Forward primer, reverse primer and probe sequences (5'-3')	GenBank accession number
70mel	Forward primer Reverse primer Probe	AGGCCAGAAGTGTCAATCT ATCGTCTGTAGCCGGGAAGC CGCAACCCGCCGGCAGCCA /
wzyO80	Forward primer Reverse primer Probe	TGGTGTGATTCCACTAGCGT AGCCATCCTGATTGGCGTGA CGGCAGCAGCAACCAAGGATGATGCC AB812032

PCR Multiplex optimisation

PCR performances

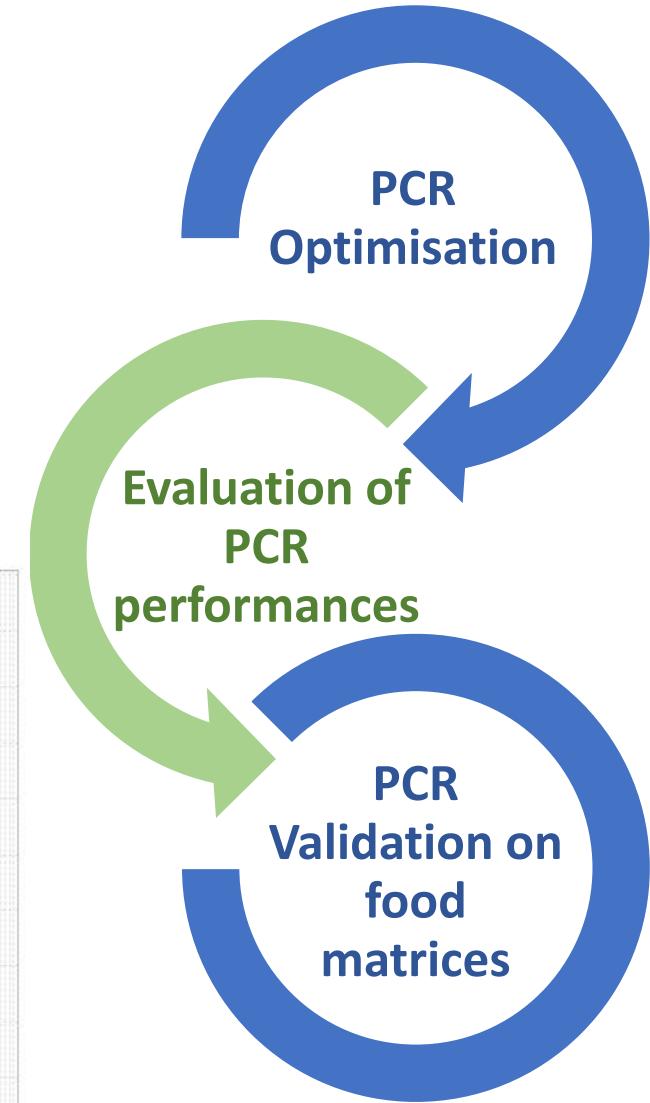

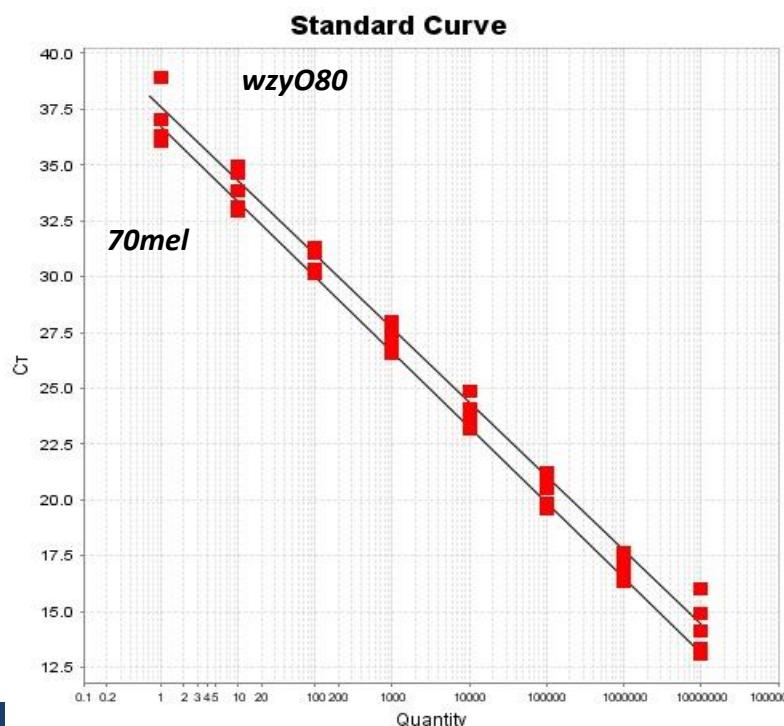

Sensitivity : *E. coli* O80:H2 (n=23) => 100 %

Specificity : Non *E. coli* O80:H2 (n=102) => 100 %

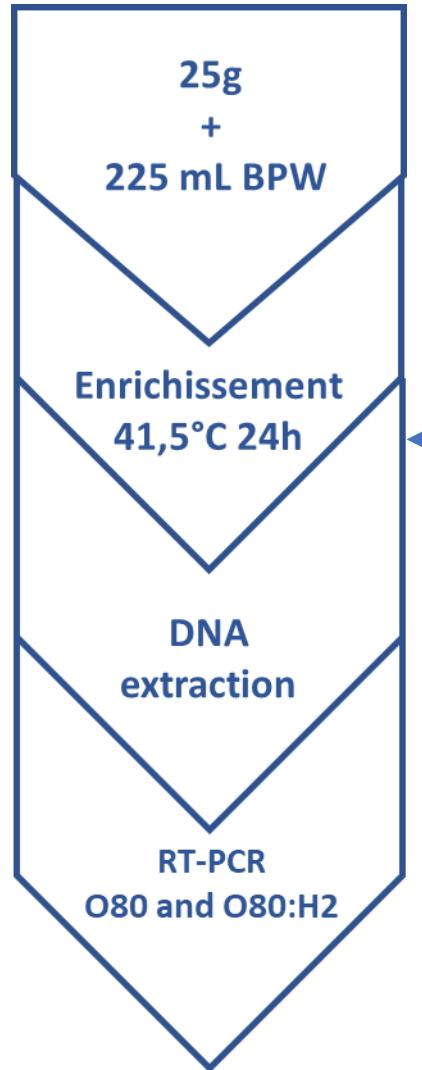

LD PCR 95 : This assay detected between 5 and 10 copies of the two target gene per reaction with
good efficiency *wzyO80* : 100,441 avec $R^2 = 0,993$

70mel : 98,768 avec $R^2 = 0,999$

Strains	Number
<i>E. coli</i> O80	4
<i>E. coli</i> O55:H9 mel -	6
<i>E. coli</i> O55:H9 mel +	2
<i>E. coli</i> STEC Top 5	44
<i>E. coli</i> STEC non Top 5	16
Non <i>E. coli</i>	30
	102

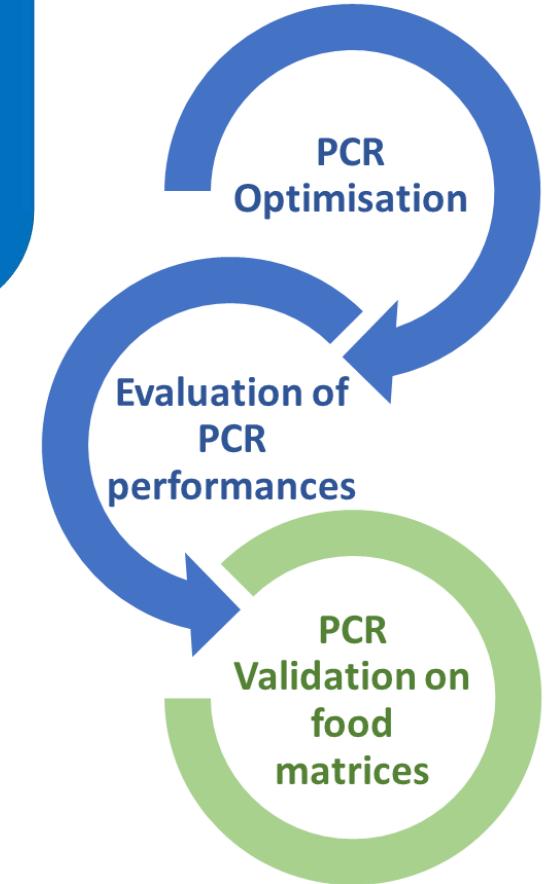

Sensitivity essays in foods

*6 contaminations levels
10¹ CFU/ml => 10⁶ CFU/ml*

**STEC 3 strains
O80:H2**

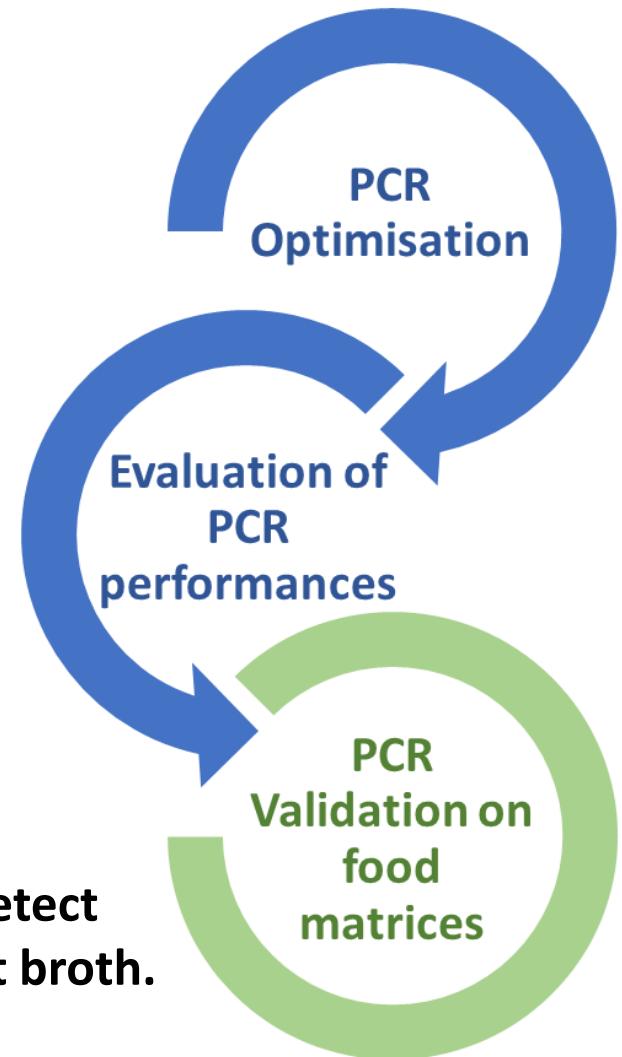

4 Types of food matrices

Sensitivity essays in foods

Food	Poultry			Minced beef			Raw milk cheese					
							Cantal			Reblochon		
Concentration (CFU/ml)	strain 1	strain 2	strain 3	strain 1	strain 2	strain 3	strain 1	strain 2	strain 3	strain 1	strain 2	strain 3
1,00E+01	-	-	-	-	-	-	-	-	-	-	-	-
1,00E+02	-	+	+	+	-	+	+	+	-	+	+	-
1,00E+03	+	+	+	+	+	+	+	+	+	+	+	+
1,00E+04	+	+	+	+	+	+	+	+	+	+	+	+
1,00E+05	+	+	+	+	+	+	+	+	+	+	+	+
1,00E+06	+	+	+	+	+	+	+	+	+	+	+	+

The post enrichment protocol showed that this RT-PCR assay was sensitive to detect *E. coli* O80:H2 at a level of $10^2/10^3$ CFU *E. coli* per ml of cheese or meat enrichment broth.

Further work will be carried out :

- ✓ On the specificity of the multiplex RT-PCR,
- ✓ testing new experimentally and naturally contaminated food matrices

The tool developed will be used to identify for O80 STEC strains:

- ✓ for industrial controls,
- ✓ in the monitoring plans developed by the Ministry of Agriculture,
- ✓ or food alerts and outbreaks,
- ✓ And to help to identify the reservoir, currently unknown, and thus improve the epidemiological knowledge of this emerging clone.
