### ERRATA CORRIGE

A pagina 19, la frase:

- “1. *Transfusion Transmitted Serratia marcescens Infection*: (Severity: Level 2 - Symptoms requiring therapeutic intervention; Imputability: Level 1 - Possible; Complete resolution within few days).  
A male patient with a haematological disease was transfused with one unit of pre-storage leukodepleted **inactivated with psoralens** platelets. During the transfusion, the patient developed chills, cyanosis, fever, hypertension, and tachypnoea with complete resolution after symptomatic therapy. The transfused unit culture turned out to be positive to *Serratia marcescens*.”

è sostituita da:

- “1. *Transfusion Transmitted Serratia marcescens Infection*: (Severity: Level 2 - Symptoms requiring therapeutic intervention; Imputability: Level 1 - Possible; Complete resolution within few days).  
A male patient with a haematological disease was transfused with one unit of pre-storage leukodepleted **and irradiated** platelets. During the transfusion, the patient developed chills, cyanosis, fever, hypertension, and tachypnoea with complete resolution after symptomatic therapy. The transfused unit culture turned out to be positive to *Serratia marcescens*.”
