INFECTIOUS DISEASES

## XIX Workshop of National Reference Laboratories for Parasites

Istituto Superiore di Sanità

6-7 November 2024

Proficiency testing on artificial digestion to detect  
*Trichinella* larvae in meat samples according to  
ISO 18743:2015 or Annex III Reg UE 2015/1375

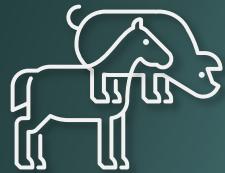

☀ Irene Tartarelli ☀

# Purpose and execution

- ❖ Test the capacity of NRLs to identify *Trichinella* muscle larvae in meat by applying ISO 18743:2015 or equivalent methods listed in reg. 2015/1375 (Annex III)
- ❖ Correct identification of positive and negative samples in a panel composed of three meatballs

# Test material

## Meat type:

- pork meat
- horse meat

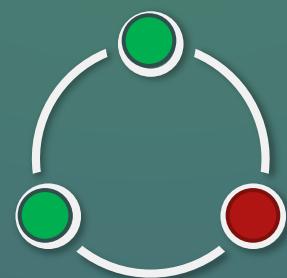

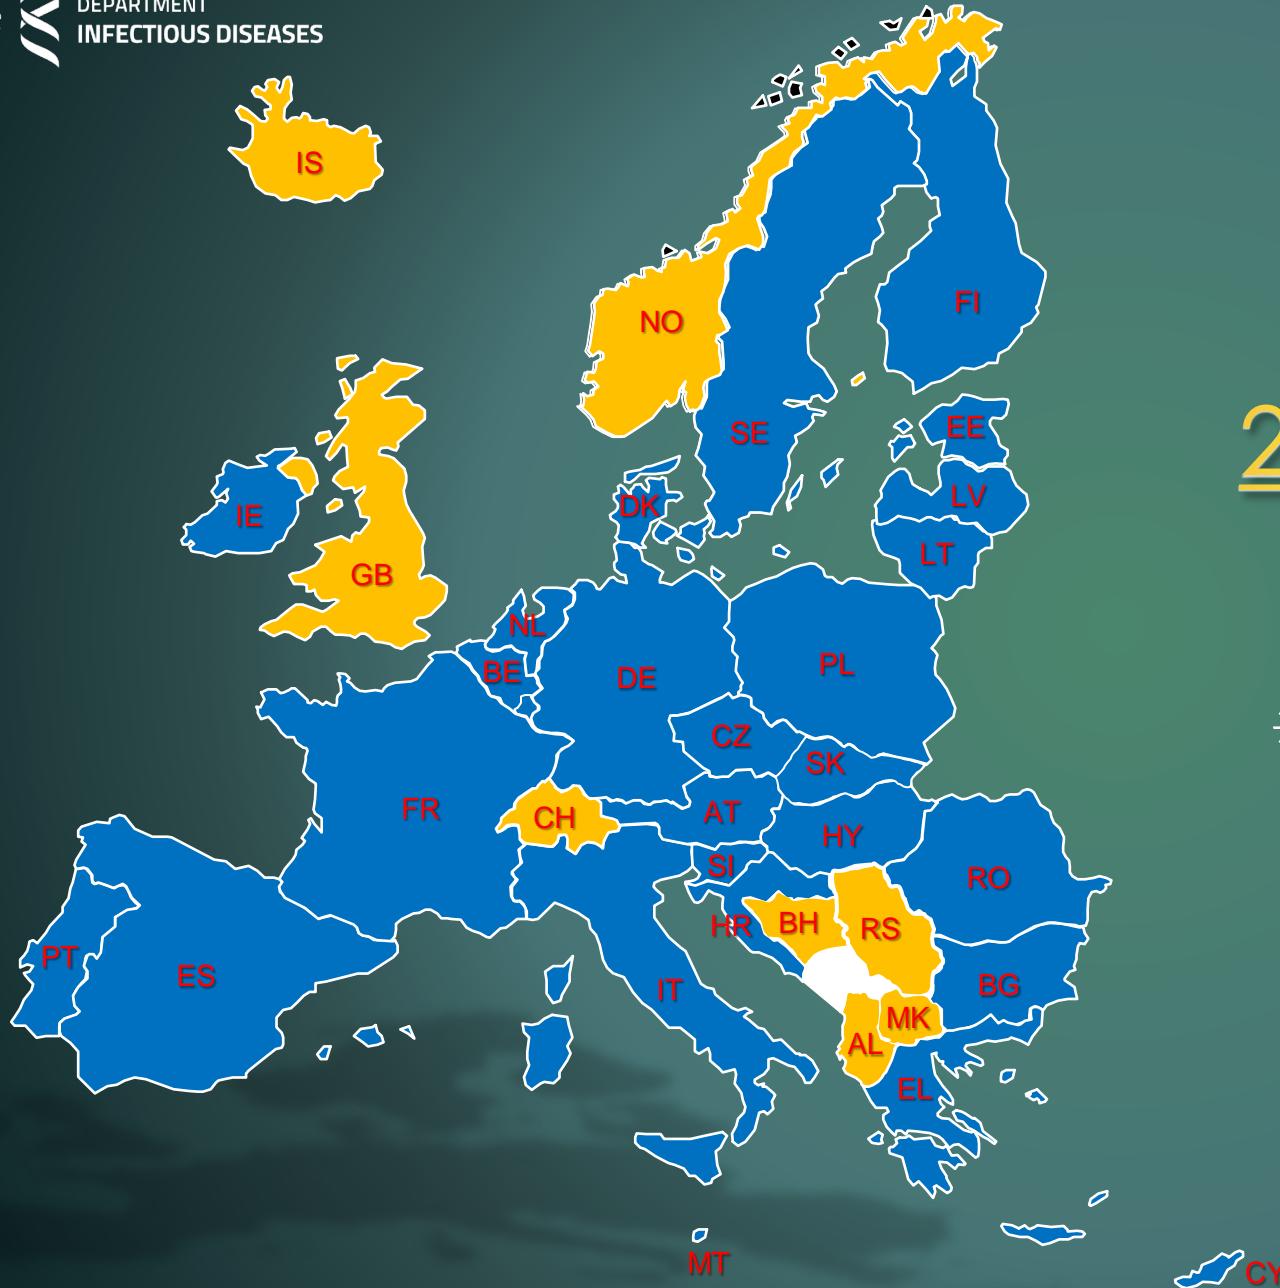

## Samples weight:

- 100g
- 35g

## 2024 PT panel composition:

- 1 negative sample
- 2 positive samples  
(4 *T. spiralis* larvae/sample)

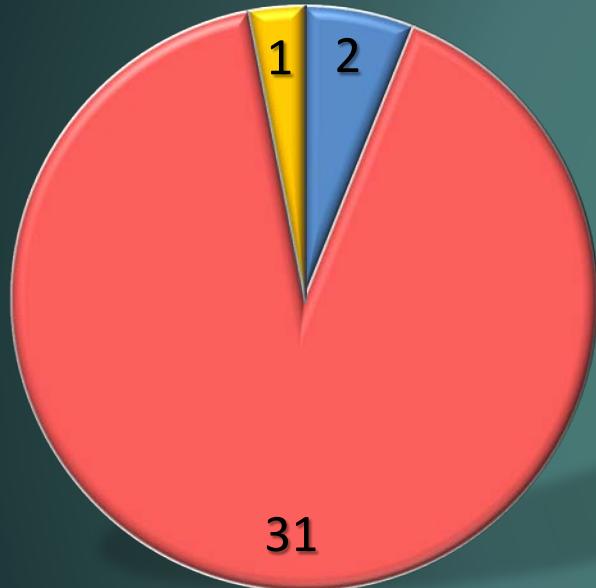

## 2024 Participants

☀ 34 NRLs (including 8 outside EU) ☀

# Samples and methods

## Sample type:

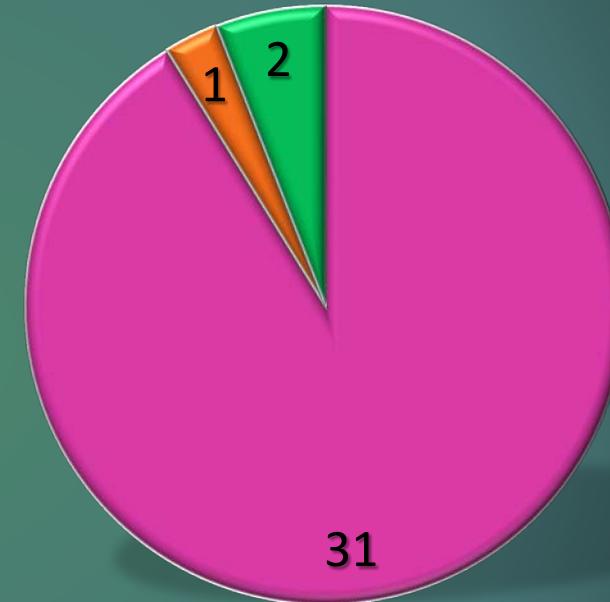

- pork 35
- pork 100
- horse 100

# Samples and methods

Method used:

- ISO 18743
- Stomacher
- Trichomatic 35

# Results Qualitative evaluation

P = passed

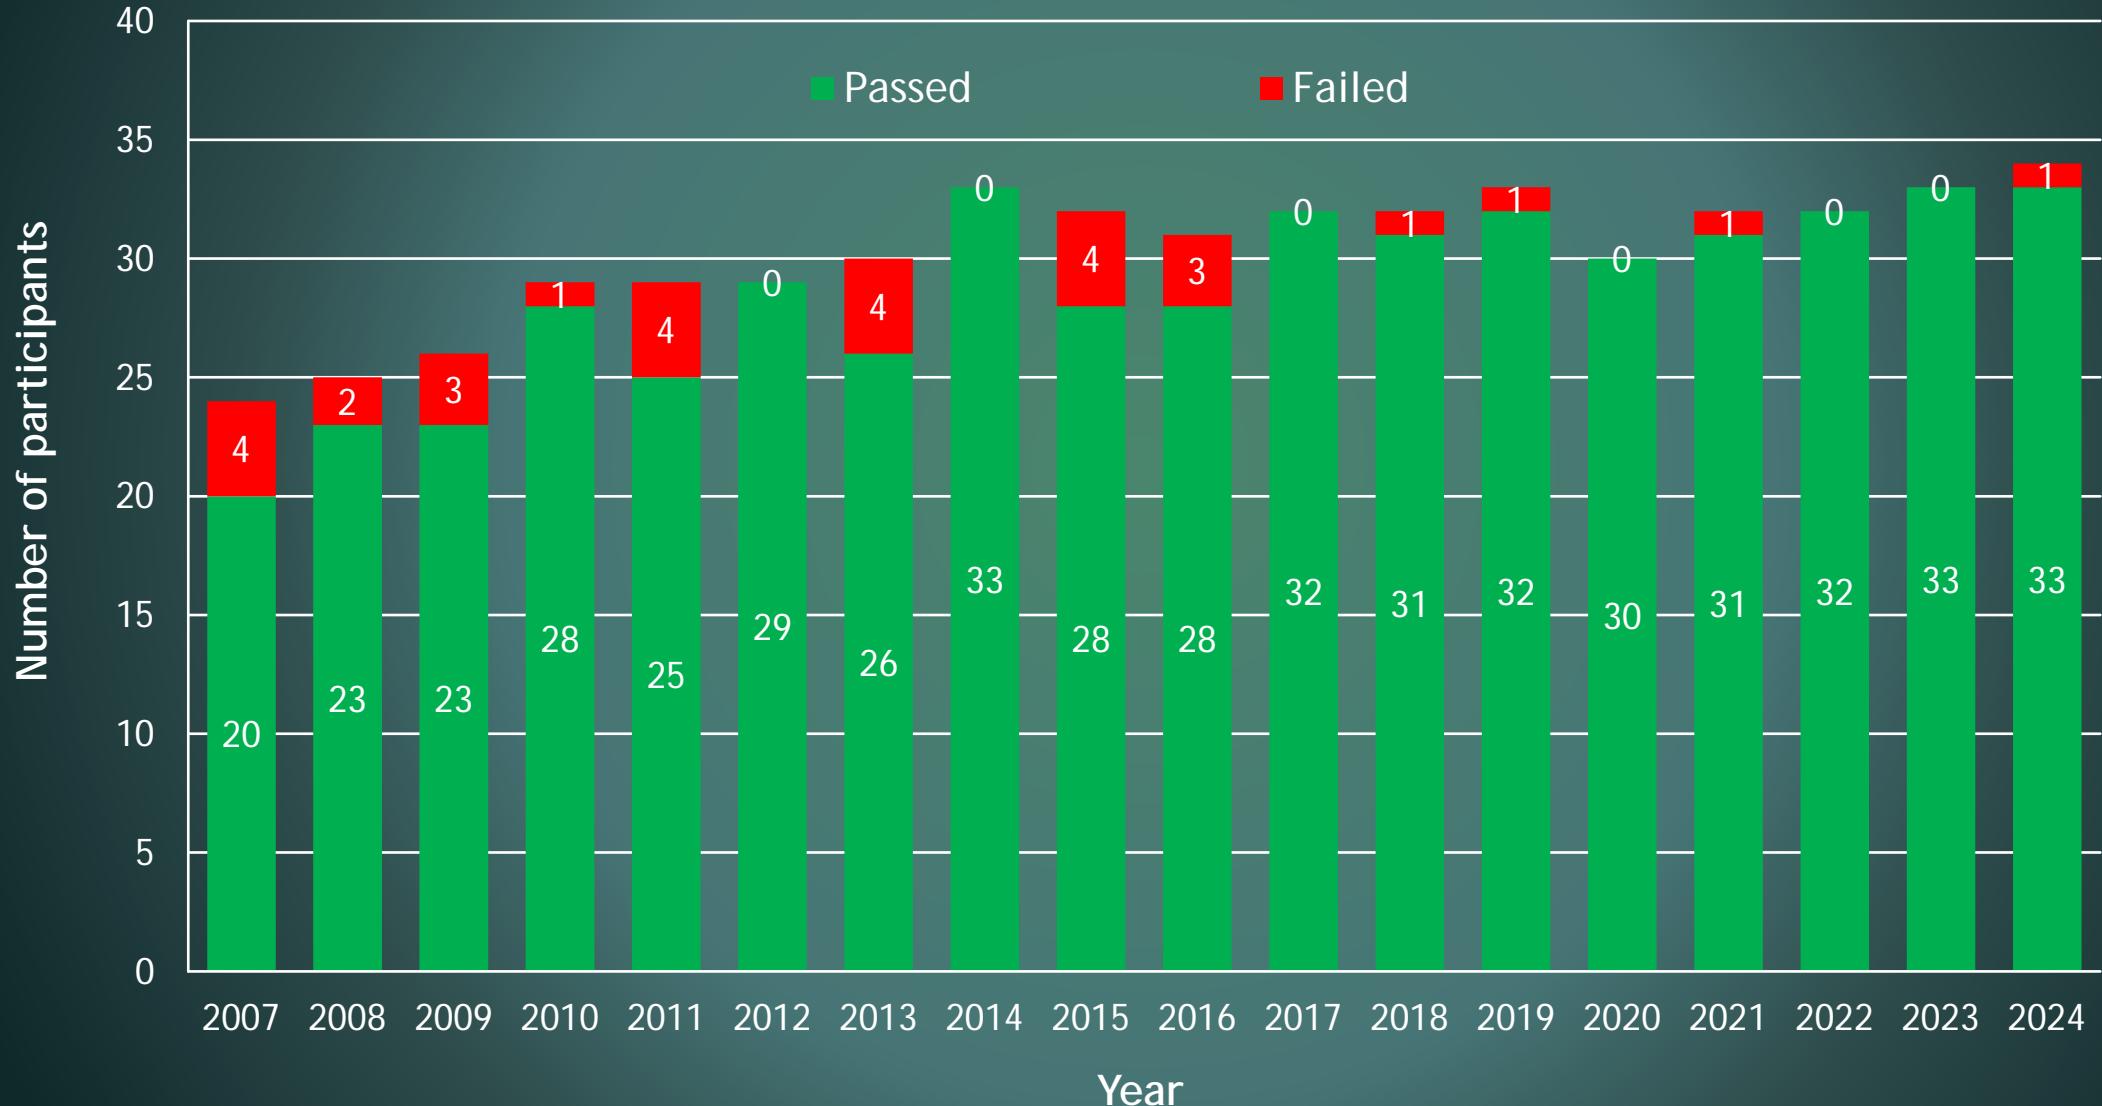

F = failed

NA = Not Applicable

- = No participation

Sporadic failures involving no more than one participant

# Overtime comparison

## Conclusion

Almost all the participating laboratories demonstrated their competence in detecting *Trichinella* larvae in meat samples. The laboratory that failed has been invited to investigate the causes of the failure and to implement the appropriate corrective actions.
